

# Interpreting Functions and Parameters

## Algebra 1 •Section 11.4

Name: _____	Date: _____	Score: _____ / 12
-------------	-------------	-------------------

**Quick Review and Helpful Hints**

Exponential models multiply by a constant factor over equal input intervals. Compare the initial value, multiplier, and long-term behavior before deciding what the model means.

▷ **Example:** Evaluate  $100(1.05)^2$ .

**Work:** Square the growth factor:  $1.05^2 = 1.1025$ . Then multiply:  $100(1.1025) = 110.25$ .

★ **Answer:** 110.25

◆ **Practice Problems**

Solve each problem. Show enough work that another student could follow your thinking.

| <p>1. In <math>y = mx + b</math>, what does <math>m</math> represent? _____</p> <p>2. In <math>y = mx + b</math>, what does <math>b</math> represent? _____</p> <p>3. In <math>A = 500(1.06)^t</math>, what is 500? _____</p> <p>4. In <math>A = 500(1.06)^t</math>, what percent change? _____</p> <p>5. In <math>h = -16t^2 + 48t + 6</math>, what does 6 represent? _____</p> | <p>6. In <math>C = 35 + 12x</math>, what does 35 represent? _____</p> <p>7. In <math>C = 35 + 12x</math>, what does 12 represent? _____</p> <p>8. In <math>P = -2(x - 4)^2 + 30</math>, what is the vertex? _____</p> <p>9. In <math>y = a(b)^x</math>, what does <math>b &gt; 1</math> mean? _____</p> <p>10. In <math>y = a(b)^x</math>, what does <math>0 &lt; b &lt; 1</math> mean? _____</p> |
|--|---|

◆ **Word Problems**

11. A phone bill is  $B = 22 + 0.10t$ . Interpret 0.10. \_\_\_\_\_
12. A medicine model is  $M = 80(0.75)^h$ . Interpret 0.75. \_\_\_\_\_

## Answer Keys

- |                                  |                           |
|----------------------------------|---------------------------|
| 1. Slope/rate of change          | 7. Cost per unit          |
| 2. Initial value/ $y$ -intercept | 8. (4, 30)                |
| 3. Initial amount                | 9. Growth                 |
| 4. 6% growth                     | 10. Decay                 |
| 5. Initial height                | 11. 10 cents per text     |
| 6. Fixed/startup cost            | 12. 75% remains each hour |

### Step-by-Step Explanations

- Think of  $m$  as the step size: it's how far  $y$  moves every time  $x$  goes up by 1.
- Set  $x = 0$  and the  $mx$  part disappears, leaving  $b$  as the starting height.
- When  $t = 0$  the growth factor is just 1, so 500 is the amount you begin with.
- Split 1.06 into  $1 + 0.06$  — the 0.06 tacked on is a 6% gain each period.
- At  $t = 0$  both  $t$  terms vanish, so 6 is the height the moment you start the clock.
- That 35 is on the bill before you've added a single unit — the cost just to get going.
- Every extra unit of  $x$  piles on another 12, so 12 is the price per unit.
- Vertex form parks the turning point right out front —  $(h, k)$  reads straight off as (4, 30).
- A base above 1 nudges each output higher than the one before, so the function climbs.
- A base squeezed between 0 and 1 trims a bit off each step, so the values keep shrinking.
- The number multiplying  $t$  is the per-text rate — every additional text adds another 10 cents.
- Multiplying by 0.75 keeps three-quarters around, which means 25% clears out every hour.

## Want Even More Algebra 1 Practice?

### Nevada Algebra I Preparation Bundle

18 full-length practice tests across three books  
Fresh test practice, detailed explanations, and  
organized review

**18 Tests**  
**3 Books**  
**One Bundle**

**Important:** These Algebra 1 resources are made for extra practice after the worksheet. Use the QR code for the state or program bundle connected with this worksheet.

#### Skill Review

- ✓ Strengthens equations, functions, systems, and modeling
- ✓ Supports steady review before tests
- ✓ Good for tutoring, homework, and independent practice

**Build the foundation.**

#### Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every test
- ✓ Useful after students finish topic worksheets

**Practice with purpose.**

#### Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps preparation organized and calm

**Move forward prepared.**
