## Quick Review

Authors write for a reason. Some write to explain how something works. Some write to describe a thing. Ask: what does the author want me to know?

### PART 1 — READ

Read the passage. Then answer the questions.

#### Why Plants Need the Sun

Plants are living things, just like animals. But plants cannot walk to find food. Instead, plants make their own food. To do this, a plant needs three things. It needs sunlight, water, and air.

The leaves of a plant catch the light from the sun. The plant uses this light to make food. This food is a kind of sugar. The plant uses the sugar to grow tall and strong. Without sunlight, a plant cannot make food.

A plant that does not get sunlight will turn pale and weak. Soon it may die. That is why you should put a plant near a sunny window. The sun helps the plant stay green, healthy, and alive.
