Quick Review

Authors write for a reason. Some write to explain how something works. Some write to describe a thing. Ask: what does the author want me to know?

PART 1 — READ

Read the passage. Then answer the questions.

Why Plants Need the Sun

Plants are living things, just like animals. But plants cannot walk to find food. Instead, plants make their own food. To do this, a plant needs three things. It needs sunlight, water, and air.

The leaves of a plant catch the light from the sun. The plant uses this light to make food. This food is a kind of sugar. The plant uses the sugar to grow tall and strong. Without sunlight, a plant cannot make food.

A plant that does not get sunlight will turn pale and weak. Soon it may die. That is why you should put a plant near a sunny window. The sun helps the plant stay green, healthy, and alive.
