

Adding Within 1,000

Name: _____

Date: _____

Score: _____ / 24

Q Quick Review

Adding three-digit numbers works just like adding two-digit numbers, only with one more column. Line up the **ones**, **tens**, and **hundreds**. Add the ones first, then the tens, then the hundreds. Whenever a column adds up to 10 or more, **regroup** — carry one to the next place on the left. Take it slow, one column at a time, and remember to add in any number you carried.

◇ **Example:** Find the sum: $256 + 178$.

⇒ Add the ones: $6 + 8 = 14$, so write 4 and carry 1 ten. Add the tens: $5 + 7 = 12$, plus the carried 1 makes 13 — write 3 and carry 1 hundred. Add the hundreds: $2 + 1 = 3$, plus the carried 1 makes 4. So $256 + 178 = 434$.

Answer: $256 + 178 = 434$

PRACTICE

Add to find each sum.
