## Q Quick Review

**Addition** means putting two groups together to find how many in all. The numbers you add are **addends**, and the result is the **sum**. A helpful trick is **making a ten**: to add  $8 + 5$ , take 2 from the 5 to make 8 into 10, then  $10 + 3 = 13$ . You can also **count on** from the bigger number. Knowing your addition facts quickly makes all of math easier, so practice them until they feel automatic.

◇ **Example:** Find the sum:  $9 + 6$ .

⇒ Let's use the make-a-ten trick. We want to turn 9 into 10, and 9 needs just 1 more. Take 1 from the 6, which leaves 5. Now the problem becomes  $10 + 5$ , which is easy:  $10 + 5 = 15$ . So  $9 + 6 = 15$ .

**Answer:**  $9 + 6 = 15$

## PRACTICE

Add to find each sum.
