

# Mentally Adding and Subtracting 10 and 100

Name: \_\_\_\_\_

Score: \_\_\_\_\_ / 24

## Q Quick Review

You can add or subtract 10 and 100 **in your head** — no paper needed! When you **add or subtract** 10, only the **tens digit** changes. When you **add or subtract** 100, only the **hundreds digit** changes. For example,  $342 + 10 = 352$  and  $342 + 100 = 442$ . The other digits stay exactly the same. This makes adding and subtracting tens and hundreds quick and easy.

◇ **Example:** Find  $463 + 100$  and  $463 - 10$  using mental math.

⇒ For  $463 + 100$ , only the hundreds digit changes. The 4 hundreds become 5 hundreds, so  $463 + 100 = 563$ . For  $463 - 10$ , only the tens digit changes. The 6 tens become 5 tens, so  $463 - 10 = 453$ . The other digits never move.

**Answer:**  $463 + 100 = 563$ ,  $463 - 10 = 453$
