## Quick Review

When you meet a new word, look at the words around it. Clue types: **definition** (the meaning is given, often after *or*), **example** (a list of cases shows what fits), **synonym** (a nearby word means the same), **antonym** (a word like *unlike* shows the opposite), and **inference** (the situation tells you).

### Explanations

1. B	All four are body states a hiker might feel. <b>B</b> matches the built-in definition ( <i>or extremely hungry</i> ). The others fit the situation (a long climb) but ignore the actual definition clue.
2. D	The word <i>or</i> introduces a restated meaning — a definition clue. An antonym would use <i>unlike/but</i> ; an example would list cases; inference is needed only when no direct restatement is given.
3. A	<b>Such as</b> introduces an example clue — the list points to A. B is wrong even though it sounds animal-ish (birds aren't reptiles); C uses the tempting word <i>scales</i> but fish aren't reptiles; D is invertebrate, the opposite kind of animal.
4. C	All four are negative moods. The <i>unlike</i> contrast tells you <i>glum</i> is the opposite of <i>cheerful</i> . <b>Sad and gloomy</b> is the direct opposite; quiet/shy is about social behavior; nervous is about worry; tired is about energy.
5. A	<b>Unlike</b> signals an opposite — an antonym clue. A synonym clue would use <i>or</i> ; a definition would restate; an example would list cases.
6. B	The synonym clue is right there: <i>so tired</i> . A and C fit the camping situation but ignore the synonym; D is the opposite of tired.
7. D	All four are real dog reactions — you must INFER from the situation. Hiding under the table during thunder = fear, so D fits. A shows boldness (wrong direction); B shows curiosity; C shows play.
8. C	Each option is something soup can be. The clue <i>warned us to wait</i> means the soup is too hot to be safe. <b>C</b> is the only answer that explains the warning; A and D describe taste; B is the opposite.
9. A	The word <i>or</i> introduces a restatement of meaning — a definition clue. No contrast, no list, no figuring out needed.
10. B	<i>While</i> sets up a contrast with the noisy cousins, so <i>tranquil</i> = opposite of noisy = <b>calm and quiet</b> . A is a tempting inference (calm could mean sleeping) but tranquil means peaceful awake; C is partial (quiet but unhappy); D is the same as noisy (no contrast).
