Explanations	
1. D	'Must' = strict obligation/rule. 'Could' suggests it's optional or past ability; 'should' is a recommendation, not a rule; 'might' shows possibility, not requirement. All four are grammatical — only 'must' matches the meaning 'strict rule'.
2. C	'May I...?' is the standard polite request for permission. 'Must I' asks if it's required; 'Should I' asks for advice; 'Would I' is used for hypotheticals, not permission requests.
3. A	'Might' = possibly. 'Should' = expectation/advice; 'must' = certainty or rule; 'would' = hypothetical. Only 'might' fits 'maybe it will rain'.
4. B	'Can' = is able to. 'Should' = ought to; 'must' = is required to; 'would' = hypothetical/polite. Only 'can' matches 'is able'.
5. D	'Should' = advice/expectation. 'Might' = possibility; 'could' = it's an option; 'would' = hypothetical. Only 'should' tells the listener what is the right thing to do.
6. A	'Could' = past ability (was able to). 'Can' is present ability; 'might' is possibility; 'must' is obligation — none describe a past skill.
7. C	'Would you please...' is the most polite request. 'Must you' sounds demanding; 'Should you' asks for advice about the listener; 'Might you' is rare and old-fashioned in everyday speech.
8. must	A law is a STRICT requirement, so 'must'. Accept: 'must'. Common wrong answers and why: 'should' (advice, weaker than a law); 'can' (ability, not required); 'may' (permission/possibility, not a rule); 'might' (possibility — drivers don't 'might' stop at lights, they have to).
9. B	Modals are followed by the BARE verb (no 'to' and no -s). A wrongly adds 'to'; C wrongly adds -s to the modal; D wrongly adds 'is' before the modal. Only B has the modal + bare verb pattern.
10.	Answer: Example: I might go to the library on Saturday. Sentence must contain 'might' + bare verb AND show possibility (not certainty). Mark wrong: 'I might to go' (extra 'to'); 'I mights go' (modal with -s); 'I might going' (verb-ing instead of bare verb); 'I will might go' (two modals stacked).
