### Explanations

1. A	<b>A</b> — the italic label <b>verb</b> right after the entry word names the part of speech. B tells you how to SAY it, not what kind of word; C is just the third meaning; D shows which sense is most common, not the part of speech.
2. D	Words on the page fall alphabetically between <b>marble</b> and <b>masquerade</b> . Compare letter by letter: <i>mastodon</i> begins <i>mas-t</i> , which sorts AFTER <i>mas-q-uerade</i> (because <i>t &gt; q</i> ), so <i>mastodon</i> is NOT on this page. <i>margin</i> (mar-g-) and <i>marigold</i> (mar-i-) come before <i>masq-</i> ; <i>mason</i> (mas-o-) comes between <i>marble</i> and <i>masq-</i> .
3. B	<b>B</b> — a thesaurus lists synonyms ( <i>swift, quick, speedy, rapid</i> ) so you can pick a more vivid word. A defines a word; C only covers terms in one specific book; D is for moving between languages.
4. D	<b>D</b> — a textbook's <b>glossary</b> lists key terms used in that book with the meaning the textbook intends. A gives only synonyms; B tells you WHERE the term appears in the book, not what it means; C moves words between languages.
5. C	<b>C</b> — Mara <i>tied</i> a bow ON a present, so she made a knot with loops — that is <b>bow</b> <sup>2</sup> (the noun, /boʊ/). A is the bend-forward verb. B and D ignore the context.
6. B	<b>B</b> — every word is spelled correctly, so a spell-checker would not catch the issue. A <b>grammar-checker</b> would flag the verb-form error ( <i>went</i> should be <i>gone</i> after <i>have</i> ). A misses grammar errors; C only finds synonyms; D moves between languages.
7. D	All four mean <i>old</i> in some way, but a thesaurus shows shades of meaning. <b>Elderly</b> is the respectful word for older people. <i>Ancient</i> exaggerates and would sound rude; <i>antique</i> and <i>vintage</i> apply to objects (furniture, clothing), not to people.
8. C	<b>C</b> — in the sentence, <i>contract</i> is a verb meaning <i>to make smaller</i> ; the dictionary lists that meaning under the second entry, with stress on the second syllable: /kŋtrækt/. A is the noun (an agreement). B and D ignore the entry's split.
9. A	<b>A</b> — a translator ( <i>library</i> → <i>biblioteca</i> ) is the right tool. B defines the English word in English; C lists English synonyms; D gives long articles, not single-word translations.
10. B	<b>B</b> — the numbered definitions (1, 2, 3...) list the different meanings in order. A tells how to say the word; C names the type of word (noun, verb, etc.); D tells WHERE the word came from historically.
