

Dividing Decimals by Decimals

Grade 5 Math • Section 7.5

Name: _____

Date: _____

Score: _____ / 17

Quick Review and Helpful Hints

Steps: (1) Move the decimal in the **divisor** to make it a whole number. (2) Move the decimal in the **dividend** the same number of places. (3) Divide normally.

Lightbulb: $6.3 \div 0.9$: move both decimals 1 place right $\rightarrow 63 \div 9 = 7$.

Warning: You must move the decimal the **same** number of places in both the divisor and the dividend.

Example: Find $3.78 \div 0.6$.

Hand: Move the decimal 1 place right in both: $37.8 \div 6 = 6.3$.

Lightbulb: Answer: 6.3

Practice Problems

Divide.

- | | | |
|----------------------------|------------------------------|------------------------------|
| 1. $4.5 \div 0.9 =$ _____ | 6. $12.6 \div 0.06 =$ _____ | 11. $15.5 \div 0.5 =$ _____ |
| 2. $7.2 \div 0.8 =$ _____ | 7. $0.48 \div 0.4 =$ _____ | 12. $2.88 \div 0.12 =$ _____ |
| 3. $3.6 \div 0.12 =$ _____ | 8. $9.36 \div 1.2 =$ _____ | 13. $4.86 \div 0.6 =$ _____ |
| 4. $8.1 \div 0.3 =$ _____ | 9. $6.25 \div 0.25 =$ _____ | 14. $10.5 \div 0.35 =$ _____ |
| 5. $5.04 \div 0.7 =$ _____ | 10. $0.72 \div 0.08 =$ _____ | 15. $0.96 \div 0.04 =$ _____ |

Word Problems

16. A piece of wire is 8.4 meters long. It is cut into pieces each 0.6 meters long. How many pieces are there? _____

17. A car travels 14.4 miles using 0.8 gallons of gas. How many miles per gallon does it get? _____

Answer Keys

- | | |
|--------|---------|
| 1. 5 | 10. 9 |
| 2. 9 | 11. 31 |
| 3. 30 | 12. 24 |
| 4. 27 | 13. 8.1 |
| 5. 7.2 | 14. 30 |
| 6. 210 | 15. 24 |
| 7. 1.2 | 16. 14 |
| 8. 7.8 | 17. 18 |
| 9. 25 | |

Step-by-Step Explanations

- Start with the main idea. For dividing decimals by decimals, line up the decimal values and compute $4.5 \div 0.9 = 5$. Write the given information first, then choose the operation that matches the situation.
- Keep the work tidy. For dividing decimals by decimals, line up the decimal values and compute $7.2 \div 0.8 = 9$. A quick estimate helps confirm that the final answer is reasonable.
- Look at what the numbers mean. For dividing decimals by decimals, line up the decimal values and compute $3.6 \div 0.12 = 30$. The explanation should show both the computation and why that computation fits the problem.
- Use the setup first. For dividing decimals by decimals, line up the decimal values and compute $8.1 \div 0.3 = 27$. Write the given information first, then choose the operation that matches the situation.
- Check the size of the answer. For dividing decimals by decimals, line up the decimal values and compute $5.04 \div 0.7 = 7.2$. A quick estimate helps confirm that the final answer is reasonable.
- Match the operation to the words. For dividing decimals by decimals, line up the decimal values and compute $12.6 \div 0.06 = 210$. The explanation should show both the computation and why that computation fits the problem.
- Write the important values first. For dividing decimals by decimals, line up the decimal values and compute $0.48 \div 0.4 = 1.2$. Write the given information first, then choose the operation that matches the situation.
- Follow the pattern carefully. For dividing decimals by decimals, line up the decimal values and compute $9.36 \div 1.2 = 7.8$. A quick estimate helps confirm that the final answer is reasonable.
- Start with the main idea. For dividing decimals by decimals, line up the decimal values and compute $6.25 \div 0.25 = 25$. The explanation should show both

the computation and why that computation fits the problem.

- Keep the work tidy. For dividing decimals by decimals, line up the decimal values and compute $0.72 \div 0.08 = 9$. Write the given information first, then choose the operation that matches the situation.
- Look at what the numbers mean. For dividing decimals by decimals, line up the decimal values and compute $15.5 \div 0.5 = 31$. A quick estimate helps confirm that the final answer is reasonable.
- Use the setup first. For dividing decimals by decimals, line up the decimal values and compute $2.88 \div 0.12 = 24$. The explanation should show both the computation and why that computation fits the problem.
- Check the size of the answer. For dividing decimals by decimals, line up the decimal values and compute $4.86 \div 0.6 = 8.1$. Write the given information first, then choose the operation that matches the situation.
- Match the operation to the words. For dividing decimals by decimals, line up the decimal values and compute $10.5 \div 0.35 = 30$. A quick estimate helps confirm that the final answer is reasonable.
- Write the important values first. For dividing decimals by decimals, line up the decimal values and compute $0.96 \div 0.04 = 24$. The explanation should show both the computation and why that computation fits the problem.
- Follow the pattern carefully. For dividing decimals by decimals, divide total length by piece length: $8.4 \div 0.6 = 14$. Write the given information first, then choose the operation that matches the situation.
- Start with the main idea. For dividing decimals by decimals, miles per gallon is $14.4 \div 0.8 = 18$. A quick estimate helps confirm that the final answer is reasonable.

Want Even More Practice?

Check Out Our Other New York NYSTP Test Books!

New York NYSTP Grade 5 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for NYSTP test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
