

# Dividing by One-Digit Divisors

Grade 5 Math • Section 2.2

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_ / 17

## Quick Review and Helpful Hints

- 👉 **Long-division steps:** Divide → Multiply → Subtract → Bring down. Repeat.
- 💡 Check by multiplying: quotient  $\times$  divisor + remainder = dividend.
- ⚠️ If a digit in the dividend is too small to divide, write 0 in the quotient and bring down the next digit.

🔍 **Example:** Find  $4,536 \div 8$ .

👉 8 goes into 45 five times ( $8 \times 5 = 40$ , remainder 5). Bring down 3:  $53 \div 8 = 6$  remainder 5. Bring down 6:  $56 \div 8 = 7$  exactly. Answer: 567.

💡 **Answer:** 567

## Practice Problems

Divide. Write the quotient and any remainder.

- |                           |                            |                            |
|---------------------------|----------------------------|----------------------------|
| 1. $846 \div 3 =$ _____   | 6. $2,709 \div 9 =$ _____  | 11. $6,125 \div 5 =$ _____ |
| 2. $975 \div 5 =$ _____   | 7. $4,816 \div 8 =$ _____  | 12. $8,461 \div 7 =$ _____ |
| 3. $1,248 \div 4 =$ _____ | 8. $1,530 \div 6 =$ _____  | 13. $3,504 \div 8 =$ _____ |
| 4. $3,654 \div 6 =$ _____ | 9. $9,072 \div 4 =$ _____  | 14. $2,917 \div 9 =$ _____ |
| 5. $5,040 \div 7 =$ _____ | 10. $7,203 \div 3 =$ _____ | 15. $5,555 \div 6 =$ _____ |

## Word Problems

16. A bakery makes 2,346 cookies and packs them equally into 6 boxes. How many cookies are in each box? \_\_\_\_\_

17. A ribbon is 1,575 centimeters long. It is cut into 9 equal pieces. How long is each piece? \_\_\_\_\_

## Answer Keys

- |          |               |
|----------|---------------|
| 1. 282   | 10. 2,401     |
| 2. 195   | 11. 1,225     |
| 3. 312   | 12. 1,208 R 5 |
| 4. 609   | 13. 438       |
| 5. 720   | 14. 324 R 1   |
| 6. 301   | 15. 925 R 5   |
| 7. 602   | 16. 391       |
| 8. 255   | 17. 175       |
| 9. 2,268 |               |

### Step-by-Step Explanations

1. Start with the main idea. For dividing by one-digit divisors, divide 846 by 3.  $846 \div 3 = 282$ . Check division by multiplying the quotient back by the divisor.
2. Keep the work tidy. For dividing by one-digit divisors, divide 975 by 5.  $975 \div 5 = 195$ . A remainder means there was not enough left for one more full group.
3. Look at what the numbers mean. For dividing by one-digit divisors, divide 1,248 by 4.  $1,248 \div 4 = 312$ . Use estimation to choose a quotient that is close before you divide exactly.
4. Use the setup first. For dividing by one-digit divisors, divide 3,654 by 6.  $3,654 \div 6 = 609$ . Check division by multiplying the quotient back by the divisor.
5. Check the size of the answer. For dividing by one-digit divisors, divide 5,040 by 7.  $5,040 \div 7 = 720$ . A remainder means there was not enough left for one more full group.
6. Match the operation to the words. For dividing by one-digit divisors, divide 2,709 by 9.  $2,709 \div 9 = 301$ . Use estimation to choose a quotient that is close before you divide exactly.
7. Write the important values first. For dividing by one-digit divisors, divide 4,816 by 8.  $4,816 \div 8 = 602$ . Check division by multiplying the quotient back by the divisor.
8. Follow the pattern carefully. For dividing by one-digit divisors, divide 1,530 by 6.  $1,530 \div 6 = 255$ . A remainder means there was not enough left for one more full group.
9. Start with the main idea. For dividing by one-digit divisors, divide 9,072 by 4.  $9,072 \div 4 = 2,268$ . Use estimation to choose a quotient that is close before you divide exactly.
10. Keep the work tidy. For dividing by one-digit divisors, divide 7,203 by 3.  $7,203 \div 3 = 2,401$ . Check division by multiplying the quotient back by the divisor.
11. Look at what the numbers mean. For dividing by one-digit divisors, divide 6,125 by 5.  $6,125 \div 5 = 1,225$ . A remainder means there was not enough left for one more full group.
12. Use the setup first. For dividing by one-digit divisors, divide 8,461 by 7.  $8,461 \div 7 = 1,208$  remainder 5. Use estimation to choose a quotient that is close before you divide exactly.
13. Check the size of the answer. For dividing by one-digit divisors, divide 3,504 by 8.  $3,504 \div 8 = 438$ . Check division by multiplying the quotient back by the divisor.
14. Match the operation to the words. For dividing by one-digit divisors, divide 2,917 by 9.  $2,917 \div 9 = 324$  remainder 1. A remainder means there was not enough left for one more full group.
15. Write the important values first. For dividing by one-digit divisors, divide 5,555 by 6.  $5,555 \div 6 = 925$  remainder 5. Use estimation to choose a quotient that is close before you divide exactly.
16. Follow the pattern carefully. For dividing by one-digit divisors, divide cookies equally:  $2,346 \div 6 = 391$ . Check division by multiplying the quotient back by the divisor.
17. Start with the main idea. For dividing by one-digit divisors, divide the ribbon length by 9:  $1,575 \div 9 = 175$  cm. A remainder means there was not enough left for one more full group.

## 7 Washington Smarter Balanced Grade 5 Math Practice Tests

7 full-length Grade 5 math practice tests with detailed explanations  
Verified live product page for this state or program.

**7 Tests  
Detailed  
Explanations**

**Important:** Use the QR code for the verified live product page. Practice-test availability can vary by state or program, so this worksheet links to the strongest matching live Grade 5 math resource.

### Targeted Review

- ✓ Focused Grade 5 math practice by tested skill
- ✓ Clear question formats for steady review
- ✓ Useful for homework, tutoring, and test prep
- ✓ Helps students find gaps before test day

**Review the essentials first.**

### 7 Practice Tests

- ✓ 7 complete practice tests for realistic preparation
- ✓ Detailed explanations support independent study
- ✓ Aligned with the selected state or program
- ✓ Strong fit for students who need more test-style practice

**Build test stamina with full practice.**

### Confidence Builder

- ✓ Mixes skill review with test-taking practice
- ✓ Helps parents and teachers track readiness
- ✓ Encourages consistent practice over time
- ✓ Gives students a clearer path to mastery

**Practice with purpose.**
