

# Dividing by Two-Digit Divisors

Grade 5 Math • Section 2.3

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_ / 17

## Quick Review and Helpful Hints

**Strategy:** Estimate the quotient first using compatible numbers. Then use the standard long-division algorithm.

To estimate  $2,856 \div 34$ , think  $2,800 \div 35 = 80$ , so the answer is near 80.

Always multiply back to check:  $\text{quotient} \times \text{divisor} + \text{remainder} = \text{dividend}$ .

**Example:** Find  $1,974 \div 42$ .

Estimate:  $2,000 \div 40 = 50$ , so the answer is near 47. 42 goes into 197 four times ( $42 \times 4 = 168$ ). Subtract:  $197 - 168 = 29$ . Bring down 4: 294.  $42 \times 7 = 294$  exactly. Answer: 47.

**Answer:** 47

## Practice Problems

Divide. Write the quotient and any remainder.

- |                            |                             |                             |
|----------------------------|-----------------------------|-----------------------------|
| 1. $858 \div 22 =$ _____   | 6. $4,368 \div 72 =$ _____  | 11. $7,488 \div 81 =$ _____ |
| 2. $1,440 \div 32 =$ _____ | 7. $2,730 \div 35 =$ _____  | 12. $2,484 \div 36 =$ _____ |
| 3. $2,576 \div 46 =$ _____ | 8. $5,016 \div 66 =$ _____  | 13. $4,032 \div 63 =$ _____ |
| 4. $3,024 \div 54 =$ _____ | 9. $1,904 \div 28 =$ _____  | 14. $6,375 \div 25 =$ _____ |
| 5. $1,125 \div 15 =$ _____ | 10. $3,510 \div 45 =$ _____ | 15. $3,192 \div 42 =$ _____ |

## Word Problems

16. A factory packs 3,744 bottles into cases of 24. How many full cases can they fill? \_\_\_\_\_

17. A bus company needs to transport 1,890 students. Each bus holds 45 students. How many buses are needed? \_\_\_\_\_

## Answer Keys

| 2. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">45</span>      | 11. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">92 R 36</span> |
| 3. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">56</span>      | 12. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">69</span>      |
| 4. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">56</span>      | 13. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">64</span>      |
| 5. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">75</span>      | 14. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">255</span>     |
| 6. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">60 R 48</span> | 15. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">76</span>      |
| 7. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">78</span>      | 16. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">156</span>     |
| 8. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">76</span>      | 17. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">42</span>      |
| 9. <span style="border: 1px solid black; border-radius: 5px; padding: 2px 5px;">68</span>      |   |

### Step-by-Step Explanations

1. Start with the main idea. For dividing by two-digit divisors, divide 858 by 22.  $858 \div 22 = 39$ . Check division by multiplying the quotient back by the divisor.
2. Keep the work tidy. For dividing by two-digit divisors, divide 1,440 by 32.  $1,440 \div 32 = 45$ . A remainder means there was not enough left for one more full group.
3. Look at what the numbers mean. For dividing by two-digit divisors, divide 2,576 by 46.  $2,576 \div 46 = 56$ . Use estimation to choose a quotient that is close before you divide exactly.
4. Use the setup first. For dividing by two-digit divisors, divide 3,024 by 54.  $3,024 \div 54 = 56$ . Check division by multiplying the quotient back by the divisor.
5. Check the size of the answer. For dividing by two-digit divisors, divide 1,125 by 15.  $1,125 \div 15 = 75$ . A remainder means there was not enough left for one more full group.
6. Match the operation to the words. For dividing by two-digit divisors, divide 4,368 by 72.  $4,368 \div 72 = 60$  remainder 48. Use estimation to choose a quotient that is close before you divide exactly.
7. Write the important values first. For dividing by two-digit divisors, divide 2,730 by 35.  $2,730 \div 35 = 78$ . Check division by multiplying the quotient back by the divisor.
8. Follow the pattern carefully. For dividing by two-digit divisors, divide 5,016 by 66.  $5,016 \div 66 = 76$ . A remainder means there was not enough left for one more full group.
9. Start with the main idea. For dividing by two-digit divisors, divide 1,904 by 28.  $1,904 \div 28 = 68$ . Use estimation to choose a quotient that is close before

you divide exactly.

10. Keep the work tidy. For dividing by two-digit divisors, divide 3,510 by 45.  $3,510 \div 45 = 78$ . Check division by multiplying the quotient back by the divisor.
11. Look at what the numbers mean. For dividing by two-digit divisors, divide 7,488 by 81.  $7,488 \div 81 = 92$  remainder 36. A remainder means there was not enough left for one more full group.
12. Use the setup first. For dividing by two-digit divisors, divide 2,484 by 36.  $2,484 \div 36 = 69$ . Use estimation to choose a quotient that is close before you divide exactly.
13. Check the size of the answer. For dividing by two-digit divisors, divide 4,032 by 63.  $4,032 \div 63 = 64$ . Check division by multiplying the quotient back by the divisor.
14. Match the operation to the words. For dividing by two-digit divisors, divide 6,375 by 25.  $6,375 \div 25 = 255$ . A remainder means there was not enough left for one more full group.
15. Write the important values first. For dividing by two-digit divisors, divide 3,192 by 42.  $3,192 \div 42 = 76$ . Use estimation to choose a quotient that is close before you divide exactly.
16. Follow the pattern carefully. For dividing by two-digit divisors,  $3,744 \div 24 = 156$ , so they can fill 156 full cases. Check division by multiplying the quotient back by the divisor.
17. Start with the main idea. For dividing by two-digit divisors,  $1,890 \div 45 = 42$ , so 42 buses are needed. A remainder means there was not enough left for one more full group.

# Want Even More Practice?

Check Out Our Other Arizona AASA Test Books!

## Arizona AASA Grade 5 Math Preparation Bundle

18 full-length practice tests across three books  
(5 + 6 + 7)

No repeated questions—maximum practice value!

**18 Tests!**  
**3 Books**  
**One Bundle**

**Important:** All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

### 5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for AASA test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

**Start your practice journey!**

### 6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

**Take your practice to the next level!**

### 7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

**Go all the way with comprehensive practice!**
