

Dividing by Two-Digit Divisors

Grade 5 Math • Section 2.3

Name: _____

Date: _____

Score: _____ / 17

Quick Review and Helpful Hints

Strategy: Estimate the quotient first using compatible numbers. Then use the standard long-division algorithm.

To estimate $2,856 \div 34$, think $2,800 \div 35 = 80$, so the answer is near 80.

Always multiply back to check: $\text{quotient} \times \text{divisor} + \text{remainder} = \text{dividend}$.

Example: Find $1,974 \div 42$.

Estimate: $2,000 \div 40 = 50$, so the answer is near 47. 42 goes into 197 four times ($42 \times 4 = 168$). Subtract: $197 - 168 = 29$. Bring down 4: 294. $42 \times 7 = 294$ exactly. Answer: 47.

Answer: 47

Practice Problems

Divide. Write the quotient and any remainder.

|----------------------------|-----------------------------|-----------------------------|
| 1. $858 \div 22 =$ _____ | 6. $4,368 \div 72 =$ _____ | 11. $7,488 \div 81 =$ _____ |
| 2. $1,440 \div 32 =$ _____ | 7. $2,730 \div 35 =$ _____ | 12. $2,484 \div 36 =$ _____ |
| 3. $2,576 \div 46 =$ _____ | 8. $5,016 \div 66 =$ _____ | 13. $4,032 \div 63 =$ _____ |
| 4. $3,024 \div 54 =$ _____ | 9. $1,904 \div 28 =$ _____ | 14. $6,375 \div 25 =$ _____ |
| 5. $1,125 \div 15 =$ _____ | 10. $3,510 \div 45 =$ _____ | 15. $3,192 \div 42 =$ _____ |

Word Problems

16. A factory packs 3,744 bottles into cases of 24. How many full cases can they fill? _____
17. A bus company needs to transport 1,890 students. Each bus holds 45 students. How many buses are needed? _____

Answer Keys

|------------|-------------|
| 1. 39 | 10. 78 |
| 2. 45 | 11. 92 R 36 |
| 3. 56 | 12. 69 |
| 4. 56 | 13. 64 |
| 5. 75 | 14. 255 |
| 6. 60 R 48 | 15. 76 |
| 7. 78 | 16. 156 |
| 8. 76 | 17. 42 |
| 9. 68 | |

Step-by-Step Explanations

1. Start with the main idea. For dividing by two-digit divisors, divide 858 by 22. $858 \div 22 = 39$. Check division by multiplying the quotient back by the divisor.
2. Keep the work tidy. For dividing by two-digit divisors, divide 1,440 by 32. $1,440 \div 32 = 45$. A remainder means there was not enough left for one more full group.
3. Look at what the numbers mean. For dividing by two-digit divisors, divide 2,576 by 46. $2,576 \div 46 = 56$. Use estimation to choose a quotient that is close before you divide exactly.
4. Use the setup first. For dividing by two-digit divisors, divide 3,024 by 54. $3,024 \div 54 = 56$. Check division by multiplying the quotient back by the divisor.
5. Check the size of the answer. For dividing by two-digit divisors, divide 1,125 by 15. $1,125 \div 15 = 75$. A remainder means there was not enough left for one more full group.
6. Match the operation to the words. For dividing by two-digit divisors, divide 4,368 by 72. $4,368 \div 72 = 60$ remainder 48. Use estimation to choose a quotient that is close before you divide exactly.
7. Write the important values first. For dividing by two-digit divisors, divide 2,730 by 35. $2,730 \div 35 = 78$. Check division by multiplying the quotient back by the divisor.
8. Follow the pattern carefully. For dividing by two-digit divisors, divide 5,016 by 66. $5,016 \div 66 = 76$. A remainder means there was not enough left for one more full group.
9. Start with the main idea. For dividing by two-digit divisors, divide 1,904 by 28. $1,904 \div 28 = 68$. Use estimation to choose a quotient that is close before you divide exactly.
10. Keep the work tidy. For dividing by two-digit divisors, divide 3,510 by 45. $3,510 \div 45 = 78$. Check division by multiplying the quotient back by the divisor.
11. Look at what the numbers mean. For dividing by two-digit divisors, divide 7,488 by 81. $7,488 \div 81 = 92$ remainder 36. A remainder means there was not enough left for one more full group.
12. Use the setup first. For dividing by two-digit divisors, divide 2,484 by 36. $2,484 \div 36 = 69$. Use estimation to choose a quotient that is close before you divide exactly.
13. Check the size of the answer. For dividing by two-digit divisors, divide 4,032 by 63. $4,032 \div 63 = 64$. Check division by multiplying the quotient back by the divisor.
14. Match the operation to the words. For dividing by two-digit divisors, divide 6,375 by 25. $6,375 \div 25 = 255$. A remainder means there was not enough left for one more full group.
15. Write the important values first. For dividing by two-digit divisors, divide 3,192 by 42. $3,192 \div 42 = 76$. Use estimation to choose a quotient that is close before you divide exactly.
16. Follow the pattern carefully. For dividing by two-digit divisors, $3,744 \div 24 = 156$, so they can fill 156 full cases. Check division by multiplying the quotient back by the divisor.
17. Start with the main idea. For dividing by two-digit divisors, $1,890 \div 45 = 42$, so 42 buses are needed. A remainder means there was not enough left for one more full group.

Want Even More Practice?

Check Out Our Other New Hampshire NH SAS Test Books!

New Hampshire NH SAS Grade 5 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for NH SAS test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
