

Estimating with Benchmark Fractions

Grade 5 Math • Section 4.5

Name: _____

Date: _____

Score: _____ / 12

Quick Review and Helpful Hints

Benchmark fractions: 0 , $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, and 1 are useful reference points for estimating.

How to estimate: Decide which benchmark each fraction is closest to, then add or subtract the benchmarks.

Lightbulb: $\frac{3}{8} \approx \frac{1}{2}$, $\frac{1}{5} \approx 0$, $\frac{7}{8} \approx 1$, $\frac{5}{12} \approx \frac{1}{2}$.

Q Example: Estimate $\frac{7}{8} + \frac{5}{12}$.

Hand: $\frac{7}{8}$ is close to 1 . $\frac{5}{12}$ is close to $\frac{1}{2}$. Estimated sum: $1 + \frac{1}{2} = 1\frac{1}{2}$. (Exact answer: $\frac{31}{24} = 1\frac{7}{24}$, which is close to our estimate.)

Lightbulb: Answer: About $1\frac{1}{2}$

Practice Problems

Estimate each sum or difference using benchmark fractions (0 , $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, 1).

1. $\frac{4}{9} + \frac{7}{8} \approx$ _____

6. $\frac{7}{10} - \frac{2}{9} \approx$ _____

2. $\frac{11}{12} - \frac{3}{8} \approx$ _____

7. $\frac{5}{6} + \frac{3}{5} \approx$ _____

3. $\frac{1}{5} + \frac{3}{7} \approx$ _____

8. $\frac{8}{9} - \frac{7}{15} \approx$ _____

4. $\frac{6}{7} - \frac{1}{9} \approx$ _____

9. $2\frac{1}{8} + 3\frac{4}{5} \approx$ _____

5. $\frac{2}{3} + \frac{5}{12} \approx$ _____

10. $5\frac{11}{12} - 2\frac{1}{7} \approx$ _____

Word Problems

11. Amy pours $\frac{7}{8}$ cup of juice and $\frac{5}{12}$ cup of sparkling water into a pitcher. Estimate the total amount. Is the pitcher likely more or less than $1\frac{1}{2}$ cups? _____

12. A board is $3\frac{11}{12}$ feet long. A carpenter cuts off about $1\frac{2}{9}$ feet. Use benchmarks to estimate how much is left. _____

Answer Keys

1. $1\frac{1}{2}$

2. $\frac{1}{2}$

3. $\frac{1}{2}$

4. 1

5. 1

6. $\frac{1}{2}$

7. $1\frac{1}{2}$

8. $\frac{1}{2}$

9. 6

10. 4

11. $1\frac{1}{2}$; about equal to $1\frac{1}{2}$

12. $2\frac{1}{2}$ ft

Step-by-Step Explanations

1. Start with the main idea. For estimating with benchmark fractions, $\frac{4}{9} \approx \frac{1}{2}$ and $\frac{7}{8} \approx 1$, so the sum is about $1\frac{1}{2}$. Fractions are easier to combine when the pieces are the same size.

2. Keep the work tidy. For estimating with benchmark fractions, $\frac{11}{12} \approx 1$ and $\frac{3}{4} \approx \frac{1}{2}$, so the difference is about $\frac{1}{2}$. Always simplify at the end so the answer is clean and useful.

3. Look at what the numbers mean. For estimating with benchmark fractions, $\frac{1}{5} \approx 0$ and $\frac{3}{7} \approx \frac{1}{2}$, so the sum is about $\frac{1}{2}$. For mixed numbers, converting to improper fractions can make the arithmetic calmer.

4. Use the setup first. For estimating with benchmark fractions, $\frac{6}{7} \approx 1$ and $\frac{1}{9} \approx 0$, so the difference is about 1. Fractions are easier to combine when the pieces are the same size.

5. Check the size of the answer. For estimating with benchmark fractions, $\frac{2}{3} \approx \frac{1}{2}$ and $\frac{5}{12} \approx \frac{1}{2}$, so the sum is about 1. Always simplify at the end so the answer is clean and useful.

6. Match the operation to the words. For estimating with benchmark fractions, $\frac{7}{10} \approx \frac{1}{2}$ and $\frac{2}{9} \approx 0$, so the difference is about $\frac{1}{2}$. For mixed numbers, converting to improper fractions can make the arithmetic calmer.

7. Write the important values first. For estimating with benchmark fractions, $\frac{5}{6} \approx 1$ and $\frac{3}{6} \approx \frac{1}{2}$, so the sum is about $1\frac{1}{2}$. Fractions are easier to combine when the pieces are the same size.

8. Follow the pattern carefully. For estimating with benchmark fractions, $\frac{8}{9} \approx 1$ and $\frac{7}{15} \approx \frac{1}{2}$, so the difference is about $\frac{1}{2}$. Always simplify at the end so the answer is clean and useful.

9. Start with the main idea. For estimating with benchmark fractions, $2\frac{1}{8} \approx 2$ and $3\frac{4}{5} \approx 4$, so the sum is about 6. For mixed numbers, converting to improper fractions can make the arithmetic calmer.

10. Keep the work tidy. For estimating with benchmark fractions, $5\frac{11}{12} \approx 6$ and $2\frac{1}{7} \approx 2$, so the difference is about 4. Fractions are easier to combine when the pieces are the same size.

11. Look at what the numbers mean. For estimating with benchmark fractions, $\frac{7}{8} \approx 1$ and $\frac{5}{12} \approx \frac{1}{2}$. Always simplify at the end so the answer is clean and useful.

12. Use the setup first. For estimating with benchmark fractions, $3\frac{11}{12} \approx 4$ and $1\frac{2}{9} \approx 1\frac{1}{2}$, so about $2\frac{1}{2}$ feet remain. For mixed numbers, converting to improper fractions can make the arithmetic calmer.

Want Even More Practice?

Check Out Our Other New Jersey NJSLA Test Books!

New Jersey NJSLA Grade 5 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for NJSLA test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
