

Multiplying and Dividing by Powers of 10

Grade 5 Math • Section 1.2

Name: _____

Date: _____

Score: _____ / 17

Quick Review and Helpful Hints

👉 **Multiplying by a power of 10:** Move the decimal point to the **right** as many places as the exponent. $3.7 \times 10^2 = 370$

👉 **Dividing by a power of 10:** Move the decimal point to the **left** as many places as the exponent. $450 \div 10^3 = 0.45$

💡 The number of zeros in 10, 100, 1,000, ... tells you how many places to move.

🔍 **Example:** Evaluate 6.42×10^3 .

👉 Since the exponent is 3, move the decimal point 3 places to the right. $6.42 \rightarrow 64.2 \rightarrow 642 \rightarrow 6,420$. We add a zero at the end because we need one more place.

💡 **Answer:** 6,420

Practice Problems

Evaluate each expression.

- | | | |
|--------------------------------|------------------------------|--------------------------------|
| 1. $5.3 \times 10 =$ _____ | 6. $34.1 \times 10 =$ _____ | 11. $460 \div 10^2 =$ _____ |
| 2. $0.48 \times 100 =$ _____ | 7. $720 \div 10 =$ _____ | 12. $0.35 \times 10^3 =$ _____ |
| 3. $2.7 \times 10^3 =$ _____ | 8. $53 \div 100 =$ _____ | 13. $7,000 \div 10^4 =$ _____ |
| 4. $0.006 \times 10^4 =$ _____ | 9. $8,400 \div 10^3 =$ _____ | 14. $12.5 \times 10^2 =$ _____ |
| 5. $9.15 \times 10^2 =$ _____ | 10. $1.9 \div 10 =$ _____ | 15. $6,300 \div 10^2 =$ _____ |

Word Problems

16. A factory produces 1.25 tons of cereal per day. How many tons does it produce in 10^2 days? _____
17. An ant weighs about 0.001 grams. Write this number using a whole number divided by a power of 10. Then find how much 10,000 ants weigh. _____

Answer Keys

- | | |
|--------------------------------------|---|
| 1. <input type="text" value="53"/> | 10. <input type="text" value="0.19"/> |
| 2. <input type="text" value="48"/> | 11. <input type="text" value="4.6"/> |
| 3. <input type="text" value="2700"/> | 12. <input type="text" value="350"/> |
| 4. <input type="text" value="60"/> | 13. <input type="text" value="0.7"/> |
| 5. <input type="text" value="915"/> | 14. <input type="text" value="1250"/> |
| 6. <input type="text" value="341"/> | 15. <input type="text" value="63"/> |
| 7. <input type="text" value="72"/> | 16. <input type="text" value="125"/> |
| 8. <input type="text" value="0.53"/> | 17. <input type="text" value="1 ÷ 1000; 10 grams"/> |
| 9. <input type="text" value="8.4"/> | |

Step-by-Step Explanations

1. Start with the main idea. For powers of 10, move the decimal 1 place(s) to the right. The result is 53. Multiplying by a power of ten moves the decimal right; dividing moves it left.
2. Keep the work tidy. For powers of 10, move the decimal 2 place(s) to the right. The result is 48. The exponent tells how many places to move, so count the moves carefully.
3. Look at what the numbers mean. For powers of 10, move the decimal 3 place(s) to the right. The result is 2700. Zeros are placeholders here, and each one helps keep the place value correct.
4. Use the setup first. For powers of 10, move the decimal 4 place(s) to the right. The result is 60. Multiplying by a power of ten moves the decimal right; dividing moves it left.
5. Check the size of the answer. For powers of 10, move the decimal 2 place(s) to the right. The result is 915. The exponent tells how many places to move, so count the moves carefully.
6. Match the operation to the words. For powers of 10, move the decimal 1 place(s) to the right. The result is 341. Zeros are placeholders here, and each one helps keep the place value correct.
7. Write the important values first. For powers of 10, move the decimal 1 place(s) to the left. The result is 72. Multiplying by a power of ten moves the decimal right; dividing moves it left.
8. Follow the pattern carefully. For powers of 10, move the decimal 2 place(s) to the left. The result is 0.53. The exponent tells how many places to move, so count the moves carefully.
9. Start with the main idea. For powers of 10, move the decimal 3 place(s) to the left. The result is 8.4. Zeros are placeholders here, and each one helps

keep the place value correct.

10. Keep the work tidy. For powers of 10, move the decimal 1 place(s) to the left. The result is 0.19. Multiplying by a power of ten moves the decimal right; dividing moves it left.
11. Look at what the numbers mean. For powers of 10, move the decimal 2 place(s) to the left. The result is 4.6. The exponent tells how many places to move, so count the moves carefully.
12. Use the setup first. For powers of 10, move the decimal 3 place(s) to the right. The result is 350. Zeros are placeholders here, and each one helps keep the place value correct.
13. Check the size of the answer. For powers of 10, move the decimal 4 place(s) to the left. The result is 0.7. Multiplying by a power of ten moves the decimal right; dividing moves it left.
14. Match the operation to the words. For powers of 10, move the decimal 2 place(s) to the right. The result is 1250. The exponent tells how many places to move, so count the moves carefully.
15. Write the important values first. For powers of 10, move the decimal 2 place(s) to the left. The result is 63. Zeros are placeholders here, and each one helps keep the place value correct.
16. Follow the pattern carefully. For powers of 10, multiply 1.25 tons by $10^2 = 100$: $1.25 \times 100 = 125$ tons. Multiplying by a power of ten moves the decimal right; dividing moves it left.
17. Start with the main idea. For powers of 10, $0.001 = \frac{1}{1000}$. For 10,000 ants, $10,000 \times 0.001 = 10$ grams. The exponent tells how many places to move, so count the moves carefully.

Want Even More Practice?

Check Out Our Other Connecticut Smarter Balanced Test Books!

Connecticut Smarter Balanced Grade 5 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for Smarter Balanced test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
