

Multiplying and Dividing by Powers of 10

Grade 5 Math • Section 1.2

Name: _____

Date: _____

Score: _____ / 17

Quick Review and Helpful Hints

✚ Multiplying by a power of 10: Move the decimal point to the **right** as many places as the exponent. $3.7 \times 10^2 = 370$

✚ Dividing by a power of 10: Move the decimal point to the **left** as many places as the exponent. $450 \div 10^3 = 0.45$

💡 The number of zeros in 10, 100, 1,000, ... tells you how many places to move.

🔍 Example: Evaluate 6.42×10^3 .

✚ Since the exponent is 3, move the decimal point 3 places to the right. $6.42 \rightarrow 64.2 \rightarrow 642 \rightarrow 6,420$. We add a zero at the end because we need one more place.

💡 Answer: 6,420

✚ Practice Problems

Evaluate each expression.

- | | | |
|--------------------------------|------------------------------|--------------------------------|
| 1. $5.3 \times 10 =$ _____ | 6. $34.1 \times 10 =$ _____ | 11. $460 \div 10^2 =$ _____ |
| 2. $0.48 \times 100 =$ _____ | 7. $720 \div 10 =$ _____ | 12. $0.35 \times 10^3 =$ _____ |
| 3. $2.7 \times 10^3 =$ _____ | 8. $53 \div 100 =$ _____ | 13. $7,000 \div 10^4 =$ _____ |
| 4. $0.006 \times 10^4 =$ _____ | 9. $8,400 \div 10^3 =$ _____ | 14. $12.5 \times 10^2 =$ _____ |
| 5. $9.15 \times 10^2 =$ _____ | 10. $1.9 \div 10 =$ _____ | 15. $6,300 \div 10^2 =$ _____ |

✚ Word Problems

16. A factory produces 1.25 tons of cereal per day. How many tons does it produce in 10^2 days? _____
17. An ant weighs about 0.001 grams. Write this number using a whole number divided by a power of 10. Then find how much 10,000 ants weigh. _____

Answer Keys

- | | |
|---------|------------------------------|
| 1. 53 | 10. 0.19 |
| 2. 48 | 11. 4.6 |
| 3. 2700 | 12. 350 |
| 4. 60 | 13. 0.7 |
| 5. 915 | 14. 1250 |
| 6. 341 | 15. 63 |
| 7. 72 | 16. 125 |
| 8. 0.53 | 17. $1 \div 1000$; 10 grams |
| 9. 8.4 | |

Step-by-Step Explanations

- Start with the main idea. For powers of 10, move the decimal 1 place(s) to the right. The result is 53. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Keep the work tidy. For powers of 10, move the decimal 2 place(s) to the right. The result is 48. The exponent tells how many places to move, so count the moves carefully.
- Look at what the numbers mean. For powers of 10, move the decimal 3 place(s) to the right. The result is 2700. Zeros are placeholders here, and each one helps keep the place value correct.
- Use the setup first. For powers of 10, move the decimal 4 place(s) to the right. The result is 60. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Check the size of the answer. For powers of 10, move the decimal 2 place(s) to the right. The result is 915. The exponent tells how many places to move, so count the moves carefully.
- Match the operation to the words. For powers of 10, move the decimal 1 place(s) to the right. The result is 341. Zeros are placeholders here, and each one helps keep the place value correct.
- Write the important values first. For powers of 10, move the decimal 1 place(s) to the left. The result is 72. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Follow the pattern carefully. For powers of 10, move the decimal 2 place(s) to the left. The result is 0.53. The exponent tells how many places to move, so count the moves carefully.
- Start with the main idea. For powers of 10, move the decimal 3 place(s) to the left. The result is 8.4. Zeros are placeholders here, and each one helps

keep the place value correct.

- Keep the work tidy. For powers of 10, move the decimal 1 place(s) to the left. The result is 0.19. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Look at what the numbers mean. For powers of 10, move the decimal 2 place(s) to the left. The result is 4.6. The exponent tells how many places to move, so count the moves carefully.
- Use the setup first. For powers of 10, move the decimal 3 place(s) to the right. The result is 350. Zeros are placeholders here, and each one helps keep the place value correct.
- Check the size of the answer. For powers of 10, move the decimal 4 place(s) to the left. The result is 0.7. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Match the operation to the words. For powers of 10, move the decimal 2 place(s) to the right. The result is 1250. The exponent tells how many places to move, so count the moves carefully.
- Write the important values first. For powers of 10, move the decimal 2 place(s) to the left. The result is 63. Zeros are placeholders here, and each one helps keep the place value correct.
- Follow the pattern carefully. For powers of 10, multiply $1.25 \text{ tons} \times 100 = 125 \text{ tons}$. Multiplying by a power of ten moves the decimal right; dividing moves it left.
- Start with the main idea. For powers of 10, $0.001 = \frac{1}{1000}$. For 10,000 ants, $10,000 \times 0.001 = 10 \text{ grams}$. The exponent tells how many places to move, so count the moves carefully.

Want Even More Practice?

Check Out Our Other Texas STAAR Test Books!

Texas STAAR Grade 5 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for STAAR test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 5
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
