

Comparing Unit Rates

Name: _____ Date: _____ Score: _____ / 24

Q Quick Review

A **rate** compares two quantities with different units, like miles and hours. A **unit rate** tells you the amount for *exactly one* of the second quantity — such as miles per *one* hour or dollars per *one* pound. To find a unit rate, **divide the first quantity by the second**. For 120 miles in 4 hours, the unit rate is $120 \div 4 = 30$ miles per hour. Unit rates make it easy to **compare** two deals: just find each unit rate, then see which is larger or smaller depending on what you want.

◇ **Example:** A car travels 120 miles in 4 hours. Find the unit rate.

⇒ A unit rate answers “how much for just one?” — here, how many miles in one hour. To get that, divide the total miles by the total hours: $120 \div 4 = 30$. So the car covers 30 miles in each single hour. We write the unit rate as 30 miles per hour.

Answer: 30 miles per hour

PRACTICE

Find each unit rate.

|------------------------------|-------|---------------------------------|-------|
| 1. 150 miles in 5 hours | _____ | 11. 90 push-ups in 9 sets | _____ |
| 2. 84 words in 7 minutes | _____ | 12. \$108 for 12 tickets | _____ |
| 3. \$96 for 8 shirts | _____ | 13. 156 photos in 12 albums | _____ |
| 4. 200 pages in 8 days | _____ | 14. 210 km in 3 hours | _____ |
| 5. 144 cookies on 6 trays | _____ | 15. \$3.50 for 5 apples | _____ |
| 6. \$45 for 5 hours of work | _____ | 16. 96 ounces in 8 bottles | _____ |
| 7. 72 students in 3 buses | _____ | 17. 275 seats in 5 rows | _____ |
| 8. 180 beats in 4 minutes | _____ | 18. \$6.30 for 7 markers | _____ |
| 9. \$56 for 7 pounds of nuts | _____ | 19. 364 miles in 7 hours | _____ |
| 10. 132 miles on 6 gallons | _____ | 20. \$15 for 4 pounds of grapes | _____ |

◆ Word Problems

21. Store A sells 6 granola bars for \$9. Store B sells 4 granola bars for \$5. Which store has the lower unit price? _____
22. Maya runs 12 miles in 2 hours. Liam runs 15 miles in 3 hours. Who runs at the faster unit rate? _____
23. A 10-ounce juice box costs \$2.00 and a 16-ounce juice box costs \$2.88. Which box costs less per ounce? _____
24. Printer X prints 90 pages in 5 minutes. Printer Y prints 96 pages in 6 minutes. Which printer is faster per minute? _____

Want Even More Practice? Check Out Our Other Ohio OST Test Books!

Ohio OST Grade 6 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for OST test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 6
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
