

Nets and Surface Area

Q Quick Review

A **net** is a flat pattern that folds up to make a solid figure. The net of a rectangular prism shows all 6 rectangular faces unfolded. The **surface area** is the total area of all those faces added together. A rectangular prism has 3 pairs of matching faces, so $SA = 2(lw + lh + wh)$: find the area of the three different faces, add them, then double. A **cube** has 6 identical square faces, so $SA = 6s^2$. Surface area is measured in **square units**, because you are covering the outside of the solid.

◇ **Example:** Find the surface area of a rectangular prism with length 6 cm, width 4 cm, and height 5 cm.

⇒ Use $SA = 2(lw + lh + wh)$. Find the three different face areas first: $lw = 6 \times 4 = 24$, $lh = 6 \times 5 = 30$, and $wh = 4 \times 5 = 20$. Add those together: $24 + 30 + 20 = 74$. Each face has a matching partner on the opposite side, so double the total: $2 \times 74 = 148$. The surface area is in square centimeters.

Answer: 148 cm²

PRACTICE

Find the surface area of each solid. Cubes give one side length; prisms give length, width, and height.

◆ Word Problems

21. A gift box is a cube with each side 8 inches long. How many square inches of wrapping paper are needed to cover it exactly?

22. A storage chest is a rectangular prism that is 20 cm long, 15 cm wide, and 10 cm tall. What is its surface area? _____
23. A fish tank is a rectangular prism 24 inches long, 12 inches wide, and 16 inches tall. The tank has no top. How many square inches of glass make up the bottom and four sides? _____
24. A number cube (die) has each edge measuring 5 mm. What is the total surface area of the cube? _____

A cube has 6 identical faces: $SA = 6 \times 8^2 = 6 \times 64 = 384$ square inches.</p> <p>22. Find the three face areas: $lw = 300$, $lh = 200$, $wh = 150$. Add them: $300 + 200 + 150 = 650$. Double it: $2 \times 650 = 1300$ square centimeters.</p> <p>23. The bottom is $24 \times 12 = 288$. The two long sides are each $24 \times 16 = 384$, totaling 768. The two short sides are each $12 \times 16 = 192$, totaling 384. Add: $288 + 768 + 384 = 1440$ square inches.</p> <p>24. A cube has 6 square faces: $SA = 6 \times 5^2 = 6 \times 25 = 150$ square millimeters.</p> |
