## Q Quick Review

Percents and rates show up everywhere with money. A **discount** is a percent taken *off* a price: a \$50 item at 20% off saves  $0.20 \times 50 = \$10$ , so you pay \$40. **Sales tax** is a percent *added* to a price. A **tip** (or gratuity) is a percent of a bill added for service. A **unit price** ( $\frac{\text{cost}}{\text{amount}}$ ) helps you compare deals. To find a percent of a money amount, change the percent to a decimal and multiply.

◊ **Example:** A meal costs \$40. How much is a 15% tip?

⇒ A tip is a percent of the bill, added on for good service. We need 15% of \$40. First change the percent to a decimal:  $15\% = 0.15$ . The word “of” means multiply, so  $0.15 \times 40 = 6$ . The tip is \$6. As a check, 10% of \$40 is \$4, and 15% should be a bit more — \$6 fits.

**Answer:** \$6

## PRACTICE

Solve each money problem.

- |                                          |       |                                             |       |
|------------------------------------------|-------|---------------------------------------------|-------|
| 1. 15% tip on a \$40 bill                | _____ | 11. 50% off a \$24 item: sale price         | _____ |
| 2. 20% off a \$50 item: amount saved     | _____ | 12. 10% off a \$70 item: amount saved       | _____ |
| 3. 8% sales tax on a \$25 purchase       | _____ | 13. Save \$12 per month for 6 months: total | _____ |
| 4. 10% tip on a \$30 bill                | _____ | 14. Unit price: \$10 for 5 pens             | _____ |
| 5. Unit price: \$6 for 3 lb              | _____ | 15. 6% sales tax on a \$50 purchase         | _____ |
| 6. 25% off a \$80 item: amount saved     | _____ | 16. 15% tip on a \$20 bill                  | _____ |
| 7. Save \$15 per week for 8 weeks: total | _____ | 17. 30% off a \$90 item: amount saved       | _____ |
| 8. Unit price: \$48 for 4 tickets        | _____ | 18. Unit price: \$18 for 6 apples           | _____ |
| 9. 5% sales tax on a \$60 purchase       | _____ | 19. 25% off a \$80 item: sale price         | _____ |
| 10. 20% tip on a \$45 bill               | _____ | 20. 4% sales tax on a \$75 purchase         | _____ |

## ◆ Word Problems

21. A backpack is priced at \$50 and is on sale for 20% off. What is the sale price of the backpack? \_\_\_\_\_
22. A family’s restaurant bill is \$40. They leave a 15% tip. What is the total amount they pay, including the tip? \_\_\_\_\_
23. Store A sells 3 pounds of rice for \$6. Store B sells 5 pounds of rice for \$15. Which store has the lower unit price? \_\_\_\_\_
24. Devon saves \$15 each week. How much will Devon have saved after 8 weeks? \_\_\_\_\_

Want Even More Practice? Check Out Our Other Arkansas ATLAS Test Books!

### Arkansas ATLAS Grade 6 Math Preparation Bundle

18 full-length practice tests across three books  
(5 + 6 + 7)

No repeated questions—maximum practice value!

**18 Tests!**  
**3 Books**  
**One Bundle**

**Important:** All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

#### 5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for ATLAS test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

**Start your practice journey!**

#### 6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

**Take your practice to the next level!**

#### 7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 6
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

**Go all the way with comprehensive practice!**
