

Introduction to Personal Financial Literacy

Name: _____

Date: _____

Score: _____ / 17

Personal financial literacy is all about understanding how money works so you can earn, save, spend, and borrow wisely—and the earlier you start, the better! You will learn the difference between *gross income* (what you earn before deductions) and *net income* (what you actually take home), how to build a **budget** that balances income with expenses and savings, and why **credit** and **debit** affect your future in very different ways. You will also see how taxes, tips, and fees fit into everyday money decisions and how simple and compound interest connect to long-term saving and borrowing. These are skills you will use for the rest of your life—whether you are choosing a phone plan, opening a bank account, or planning for college!

Key Concepts & Quick Review

Income & Taxes: Gross income is the total you earn before deductions. Net income (“take-home pay”) is what remains after taxes and other deductions.

Budget: A plan that shows how you will spend and save your income.

$$\text{Income} = \text{Expenses} + \text{Savings}$$

Simple Interest: $I = Prt$ (principal \times rate \times time).

Tips & Sales Tax: Tip = bill \times tip rate; Total with tax = price + (price \times tax rate).

Profit & Loss: Profit = Revenue – Cost. A *loss* occurs when costs exceed revenue.

Examples

① Alina earns \$12.50 per hour and works 30 hours per week. If 18% is deducted for taxes, what is her weekly net income?

Think It Through: Gross = $12.50 \times 30 = \$375$. Tax = $375 \times 0.18 = \$67.50$. Net = $375 - 67.50 = \$307.50$.

Answer: \$307.50

② Carlos has a monthly budget. He earns \$1,200. He spends \$480 on rent, \$240 on food, \$120 on transport, and saves the rest. What percent of his income does he save?

Think It Through: Total expenses = $480 + 240 + 120 = \$840$. Savings = $1,200 - 840 = \$360$.
Percent saved = $\frac{360}{1,200} \times 100 = 30\%$.

Answer: 30%

Practice Problems

Solve each problem. Round money answers to the nearest cent.

1. A worker earns \$10 per hour and works _____ 25 hours. Find the gross pay.
2. A paycheck has gross pay \$500 and 15% _____ is withheld for taxes. Find the net pay.
3. An item costs \$45 before tax. Sales tax _____ is 8%. Find the total cost.
4. A restaurant bill is \$32. Find the tip _____ amount for a 20% tip.
5. A budget has income \$600 and expenses _____ \$420. Find the savings.
6. A student saves \$150 out of \$750 _____ earned. Find the percent saved.
7. Use $I = Prt$ to find the simple interest _____ when the principal is \$400, the annual rate is 5%, and the time is 2 years.
8. A small business has revenue \$800 and _____ cost \$650. Find the profit.
9. A paycheck has gross pay \$1,200 and _____ 22% is withheld for taxes. Find the net pay.
10. An item costs \$18.50 before tax. Sales tax _____ is 7%. Find the total cost.
11. A restaurant bill is \$56. Find the total paid _____ with a 15% tip.
12. A worker earns \$14 per hour, works 32 hours, and pays 20% tax. Find the net _____ pay.
13. Use $I = Prt$ to find the simple interest _____ when the principal is \$1,000, the annual rate is 3%, and the time is 4 years.
14. A budget has income \$950 and expenses _____ \$720. Find the percent saved.
15. A business has revenue \$540 and cost _____ \$600. State whether this is a profit or loss and give the amount.

Study Tips

-  **Net income** is always less than gross income because of deductions. If your answer is bigger, double-check your work!
-  A balanced budget means **income** \geq **expenses + savings**. Tracking every category helps you avoid overspending.
-  Tip/tax problems are just percent problems: multiply the base by the rate, then add to (or subtract from) the original amount.

Word Problems

16. Sophia earns \$11 per hour at her part-time job and works 20 hours a week. She wants to save 25% of her gross weekly pay. How much does she save each week? _____
17. A family's monthly income is \$3,500. They spend \$1,050 on rent, \$700 on food, \$350 on utilities, and \$525 on other expenses. How much can they save? What percent of their income is that? _____

Answer Keys

- | | |
|-------------|--|
| 1) \$250.00 | 10) \$19.80 |
| 2) \$425.00 | 11) \$64.40 |
| 3) \$48.60 | 12) \$358.40 |
| 4) \$6.40 | 13) \$120.00 |
| 5) \$180.00 | 14) 24.21% |
| 6) 20% | 15) \$60.00 loss |
| 7) \$40.00 | 16) \$55 |
| 8) \$150.00 | 17) Save \$875; that is 25% of their income. |
| 9) \$936.00 | |

Want Even More Practice?

Check Out Our Other Alaska AK STAR Test Books!

Alaska AK STAR Grade 7 Math Preparation Bundle

18 full-length practice tests across three books (5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for AK STAR test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 7
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
