

Subtracting Integers

Name: _____

Date: _____

Score: _____ / 18

Here is the secret to subtracting integers: *don't* treat it as something new! Every subtraction can be rewritten as **adding the opposite**: $a - b = a + (-b)$. After that one rewrite, you already know what to do—just use the integer-addition rules from the last section. Try it with $-6 - (-9)$: rewrite as $-6 + 9$, and the answer is 3. The more you practice this “add-the-opposite” move, the faster and more confident you will become with any integer subtraction problem.

Key Concepts & Quick Review

Subtraction Rule: $a - b = a + (-b)$ **Keep · Change · Change (KCC):** keep the first number, change subtraction to addition, change the sign of the second number.

Examples: $7 - (-4) = 7 + 4 = 11$ $(-5) - 9 = (-5) + (-9) = -14$ $(-3) - (-10) = (-3) + 10 = 7$

Examples

① Evaluate $(-8) - (-11)$.

Think It Through: Rewrite subtraction as addition of the opposite. So $(-8) - (-11)$ becomes $(-8) + 11$. Now the signs are different, so subtract the absolute values: $11 - 8 = 3$. Since 11 has the larger absolute value, the answer is positive. Therefore the result is 3.

Answer: 3

② At sunrise the temperature was -9°F . By noon it had risen to 18°F . By how many degrees did the temperature change from sunrise to noon?

Think It Through: Change means final minus initial, so write $18 - (-9)$. Use Keep-Change-Change: keep the 18, change subtraction to addition, and change -9 to $+9$. That gives $18 + 9 = 27$. So the temperature rose 27°F .

Answer: 27°F increase

Practice Problems

Find each difference.

- | | | | |
|---------------------|-------|--------------------------|-------|
| 1. $8 - 13 =$ | _____ | 9. $(-20) - (-20) =$ | _____ |
| 2. $(-5) - 7 =$ | _____ | 10. $(-3) - 14 =$ | _____ |
| 3. $(-9) - (-3) =$ | _____ | 11. $25 - (-13) =$ | _____ |
| 4. $4 - (-11) =$ | _____ | 12. $(-8) - (-15) =$ | _____ |
| 5. $(-12) - (-8) =$ | _____ | 13. $(-40) - (-25) =$ | _____ |
| 6. $0 - (-6) =$ | _____ | 14. $6 - (-6) - 3 =$ | _____ |
| 7. $(-15) - 9 =$ | _____ | 15. $(-11) - (-5) - 9 =$ | _____ |
| 8. $7 - (-7) =$ | _____ | | |

Study Tips

- 👉 Always apply **Keep · Change · Change** before simplifying: never skip the rewrite step.
- 👉 Subtracting a **negative** always increases the value: $5 - (-3) = 5 + 3 = 8 > 5$.
- 👉 For multi-step problems, rewrite *every* subtraction as addition first, then work left to right.

Word Problems

16. At 6:00 AM the temperature in a mountain town was -14°F . By 3:00 PM the temperature had climbed to 23°F . Write a subtraction expression to find the total change in temperature, then evaluate it. By how many degrees did the temperature rise, and does the rise represent a gain or a loss? _____
17. A submarine began a mission at a depth of -520 feet. It then descended further to -785 feet. How many feet did the submarine descend during this maneuver? After reaching -785 feet, the submarine ascended 310 feet. Write and evaluate a subtraction expression to find the submarine’s new depth after ascending. _____
18. This number line shows the difference $3 - (-5)$ as a single arrow. Use the picture to (a) explain why $3 - (-5)$ is the same as $3 + 5$, (b) give the value of the expression, and (c) determine the *distance* between the two endpoints. _____

Step-by-Step Explanations

Strategy: For Subtracting Integers, rewrite subtraction as adding the opposite whenever signs get crowded, then combine the positive and negative parts carefully. For integer-subtraction, have students say the rule in words before they start calculating.

Practice 1: $8 - 13 =$ **Answer:** -5

For the first sample, rewrite $a - b$ as $a + (-b)$; the second number changes sign before the integers are combined.

Practice 15: $(-11) - (-5) - 9 =$ **Answer:** -15

Late in the set, check the sign of the number being subtracted first; taking the opposite is what keeps a double negative from slipping by.

Word-problem notes:

16. Answer: $23 - (-14) = 37^\circ\text{F}$; a gain of 37° .

Use final minus initial: $23 - (-14)$. Subtracting a negative is the same as adding the opposite, so this becomes $23 + 14 = 37$. Because the temperature increased, the change is a gain of 37°F .

17. Answer: Descended 265 *ft*; new depth = $-785 - (-310) = -475$ *ft*.

To find how much farther down the submarine went, subtract the starting depth from the new depth: $-785 - (-520) = -785 + 520 = -265$. The negative result tells you the movement was downward, so the submarine descended 265 feet. Then it ascends 310 feet, which means add 310: $-785 + 310 = -475$. So the new depth is -475 feet.

18. Answer: (a) Keep-Change-Change rewrites $3 - (-5)$ as $3 + 5$; (b) value = 8; (c) distance = 8.

Subtraction is the same as adding the opposite, so $3 - (-5) = 3 + (+5) = 3 + 5 = 8$. On the number line, the arrow shows that 3 is 8 units to the right of -5, which is exactly the distance between the two endpoints. The value of the expression equals the distance between the points.

Want Even More Practice?

Check Out Our Other Wyoming WY-TOPP Test Books!

Wyoming WY-TOPP Grade 7 Math Preparation Bundle

18 full-length practice tests across three books (5 + 6 + 7)
No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for WY-TOPP test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 7
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
