PRACTICE

Answer each question. Choose the best answer for multiple-choice items and write complete short responses.

 - The speaker is confident, so the argument is proven.
 - The speaker's strongest evidence is the attendance data from three years, not the single story about one student.
 - The funniest example is the best evidence.
 - The claim is true because the speaker repeats it.
- Which revision best applies evaluating a speaker's claims, reasoning, and evidence? Original: The speaker says clubs help everybody because my friend likes art club.
