

# Parallel and Perpendicular Lines

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Score: \_\_\_\_\_ / 24

## Quick Review

Two lines are **parallel** when they have the *same slope* — they run side by side and never meet. Two lines are **perpendicular** when they cross at a right angle, and their slopes are **negative reciprocals**: flip the fraction and change the sign. For example, the perpendicular partner of slope 2 is  $-\frac{1}{2}$ , and the partner of  $-\frac{3}{4}$  is  $\frac{4}{3}$ . A quick test: two slopes are perpendicular exactly when their *product is*  $-1$ .

◇ **Example:** A line has slope 4. What is the slope of a line perpendicular to it?  
 ⇒ Perpendicular lines meet at a right angle, and the rule for their slopes is “negative reciprocal.” That’s a two-part instruction. First, take the *reciprocal* — flip 4 (which is  $\frac{4}{1}$ ) into  $\frac{1}{4}$ . Second, change the *sign* — since 4 was positive, the answer becomes negative:  $-\frac{1}{4}$ . A good check: multiply the two slopes together,  $4 \times (-\frac{1}{4}) = -1$ . That product of  $-1$  confirms they really are perpendicular.

**Answer:**  $-\frac{1}{4}$

## PRACTICE

Find the requested slope, or decide the relationship between the lines.

- |  |       |   |       |
|--|-------|---|-------|
| 1. Parallel to slope 3                   | _____ | 11. $y = 2x + 1$ and $y = 2x - 4$                 | _____ |
| 2. Parallel to slope $-5$                | _____ | 12. $y = 3x$ and $y = -\frac{1}{3}x + 2$          | _____ |
| 3. Parallel to slope $\frac{2}{7}$       | _____ | 13. $y = 4x + 1$ and $y = 5x - 2$                 | _____ |
| 4. Perpendicular to slope 2              | _____ | 14. $y = -x + 6$ and $y = x - 3$                  | _____ |
| 5. Perpendicular to slope 5              | _____ | 15. $y = \frac{1}{2}x$ and $y = \frac{1}{2}x + 7$ | _____ |
| 6. Perpendicular to slope $-3$           | _____ | 16. Slope 6 · slope $-\frac{1}{6} = ?$            | _____ |
| 7. Perpendicular to slope $\frac{1}{4}$  | _____ | 17. Parallel to $y = 7x - 2$ , slope =?           | _____ |
| 8. Perpendicular to slope $\frac{3}{5}$  | _____ | 18. Perpendicular to $y = -2x + 9$                | _____ |
| 9. Perpendicular to slope $-\frac{2}{3}$ | _____ | 19. $y = -\frac{4}{5}x$ and $y = \frac{5}{4}x$    | _____ |
| 10. Perpendicular to slope 1             | _____ | 20. $y = 8x + 1$ and $y = 8x + 1$                 | _____ |

## Word Problems

21. A street runs along the line  $y = \frac{2}{3}x + 1$ . A new street is built parallel to it. What slope must the new street have? \_\_\_\_\_
22. A ramp follows the line  $y = 5x$ . A support beam must be perpendicular to the ramp. What slope should the beam have? \_\_\_\_\_
23. Two roads are described by  $y = -3x + 4$  and  $y = \frac{1}{3}x - 1$ . Do they meet at a right angle? \_\_\_\_\_
24. A fence runs along  $y = 4x - 2$ . A gardener wants a path parallel to the fence passing through a different spot. What slope should the path have? \_\_\_\_\_

## Answer Keys

- |                   |                    |
|-------------------|--------------------|
| 1. 3              | 13. neither        |
| 2. -5             | 14. perpendicular  |
| 3. $\frac{2}{7}$  | 15. parallel       |
| 4. $-\frac{1}{2}$ | 16. -1             |
| 5. $-\frac{1}{5}$ | 17. 7              |
| 6. $\frac{1}{3}$  | 18. $\frac{1}{2}$  |
| 7. -4             | 19. perpendicular  |
| 8. $-\frac{5}{3}$ | 20. same line      |
| 9. $\frac{3}{2}$  | 21. $\frac{2}{3}$  |
| 10. -1            | 22. $-\frac{1}{5}$ |
| 11. parallel      | 23. yes            |
| 12. perpendicular | 24. 4              |

### Step-by-Step Explanations

- |  |   |
|--|---|
| <p>1. Parallel lines share the same slope, so the slope is 3.</p> <p>2. Parallel means equal slopes, so it stays -5.</p> <p>3. A parallel line keeps the slope <math>\frac{2}{7}</math>.</p> <p>4. Flip 2 to <math>\frac{1}{2}</math> and change the sign: <math>-\frac{1}{2}</math>.</p> <p>5. Flip and negate: <math>-\frac{1}{5}</math>.</p> <p>6. Flip -3 to <math>-\frac{1}{3}</math> and change the sign: <math>\frac{1}{3}</math>.</p> <p>7. Flip <math>\frac{1}{4}</math> to 4 and negate: -4.</p> <p>8. Flip <math>\frac{3}{5}</math> to <math>\frac{5}{3}</math> and negate: <math>-\frac{5}{3}</math>.</p> <p>9. Flip <math>-\frac{2}{3}</math> to <math>-\frac{3}{2}</math> and change sign: <math>\frac{3}{2}</math>.</p> <p>10. Flip 1 to 1 and negate: -1.</p> <p>11. Both have slope 2, so the lines are parallel.</p> <p>12. Slopes 3 and <math>-\frac{1}{3}</math> are negative reciprocals — perpendicular.</p> <p>13. Slopes 4 and 5 are not equal and not negative reciprocals.</p> | <p>14. Slopes -1 and 1 multiply to -1, so they are perpendicular.</p> <p>15. Both slopes are <math>\frac{1}{2}</math>, so they are parallel.</p> <p>16. <math>6 \times (-\frac{1}{6}) = -1</math>, confirming perpendicular lines.</p> <p>17. Read the slope from <math>y = 7x - 2</math>: it's 7, and a parallel line matches it.</p> <p>18. Slope is -2; flip to <math>-\frac{1}{2}</math> and negate: <math>\frac{1}{2}</math>.</p> <p>19. <math>-\frac{4}{5}</math> and <math>\frac{5}{4}</math> are negative reciprocals: perpendicular.</p> <p>20. Identical slope <i>and</i> intercept — they are the same line.</p> <p>21. Parallel streets have equal slopes, so the new street also has slope <math>\frac{2}{3}</math>.</p> <p>22. The perpendicular slope is the negative reciprocal of 5, which is <math>-\frac{1}{5}</math>.</p> <p>23. The slopes are -3 and <math>\frac{1}{3}</math>. Their product is <math>-3 \times \frac{1}{3} = -1</math>, so the roads are perpendicular.</p> <p>24. Parallel lines share a slope, so the path must have slope 4, the same as the fence.</p> |

## Want Even More Practice? Check Out Our Other Colorado CMAS Test Books!

### Colorado CMAS Grade 8 Math Preparation Bundle

18 full-length practice tests across three books  
(5 + 6 + 7)

No repeated questions—maximum practice value!

**18 Tests!**  
**3 Books**  
**One Bundle**

**Important:** All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

#### 5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for CMAS test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

**Start your practice journey!**

#### 6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

**Take your practice to the next level!**

#### 7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 8
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

**Go all the way with comprehensive practice!**
