

Parallel and Perpendicular Lines

Name: _____ Date: _____ Score: _____ / 24

Q Quick Review

Two lines are **parallel** when they have the *same slope* — they run side by side and never meet. Two lines are **perpendicular** when they cross at a right angle, and their slopes are **negative reciprocals**: flip the fraction and change the sign. For example, the perpendicular partner of slope 2 is $-\frac{1}{2}$, and the partner of $-\frac{3}{4}$ is $\frac{4}{3}$. A quick test: two slopes are perpendicular exactly when their *product is* -1 .

◇ **Example:** A line has slope 4. What is the slope of a line perpendicular to it?
 ⇒ Perpendicular lines meet at a right angle, and the rule for their slopes is “negative reciprocal.” That’s a two-part instruction. First, take the *reciprocal* — flip 4 (which is $\frac{4}{1}$) into $\frac{1}{4}$. Second, change the *sign* — since 4 was positive, the answer becomes negative: $-\frac{1}{4}$. A good check: multiply the two slopes together, $4 \times (-\frac{1}{4}) = -1$. That product of -1 confirms they really are perpendicular.

Answer: $-\frac{1}{4}$

PRACTICE

Find the requested slope, or decide the relationship between the lines.

- | | | | |
|--|-------|---|-------|
| 1. Parallel to slope 3 | _____ | 11. $y = 2x + 1$ and $y = 2x - 4$ | _____ |
| 2. Parallel to slope -5 | _____ | 12. $y = 3x$ and $y = -\frac{1}{3}x + 2$ | _____ |
| 3. Parallel to slope $\frac{2}{7}$ | _____ | 13. $y = 4x + 1$ and $y = 5x - 2$ | _____ |
| 4. Perpendicular to slope 2 | _____ | 14. $y = -x + 6$ and $y = x - 3$ | _____ |
| 5. Perpendicular to slope 5 | _____ | 15. $y = \frac{1}{2}x$ and $y = \frac{1}{2}x + 7$ | _____ |
| 6. Perpendicular to slope -3 | _____ | 16. Slope 6 · slope $-\frac{1}{6} = ?$ | _____ |
| 7. Perpendicular to slope $\frac{1}{4}$ | _____ | 17. Parallel to $y = 7x - 2$, slope =? | _____ |
| 8. Perpendicular to slope $\frac{3}{5}$ | _____ | 18. Perpendicular to $y = -2x + 9$ | _____ |
| 9. Perpendicular to slope $-\frac{2}{3}$ | _____ | 19. $y = -\frac{4}{5}x$ and $y = \frac{5}{4}x$ | _____ |
| 10. Perpendicular to slope 1 | _____ | 20. $y = 8x + 1$ and $y = 8x + 1$ | _____ |

◆ Word Problems

21. A street runs along the line $y = \frac{2}{3}x + 1$. A new street is built parallel to it. What slope must the new street have? _____
22. A ramp follows the line $y = 5x$. A support beam must be perpendicular to the ramp. What slope should the beam have?

23. Two roads are described by $y = -3x + 4$ and $y = \frac{1}{3}x - 1$. Do they meet at a right angle? _____
24. A fence runs along $y = 4x - 2$. A gardener wants a path parallel to the fence passing through a different spot. What slope should the path have?

Answer Keys

- | | |
|-------------------|--------------------|
| 1. 3 | 13. neither |
| 2. -5 | 14. perpendicular |
| 3. $\frac{2}{7}$ | 15. parallel |
| 4. $-\frac{1}{2}$ | 16. -1 |
| 5. $-\frac{1}{5}$ | 17. 7 |
| 6. $\frac{1}{3}$ | 18. $\frac{1}{2}$ |
| 7. -4 | 19. perpendicular |
| 8. $-\frac{5}{3}$ | 20. same line |
| 9. $\frac{3}{2}$ | 21. $\frac{2}{3}$ |
| 10. -1 | 22. $-\frac{1}{5}$ |
| 11. parallel | 23. yes |
| 12. perpendicular | 24. 4 |

Step-by-Step Explanations

- | | |
|--|---|
| <p>1. Parallel lines share the same slope, so the slope is 3.</p> <p>2. Parallel means equal slopes, so it stays -5.</p> <p>3. A parallel line keeps the slope $\frac{2}{7}$.</p> <p>4. Flip 2 to $\frac{1}{2}$ and change the sign: $-\frac{1}{2}$.</p> <p>5. Flip and negate: $-\frac{1}{5}$.</p> <p>6. Flip -3 to $-\frac{1}{3}$ and change the sign: $\frac{1}{3}$.</p> <p>7. Flip $\frac{1}{4}$ to 4 and negate: -4.</p> <p>8. Flip $\frac{3}{5}$ to $\frac{5}{3}$ and negate: $-\frac{5}{3}$.</p> <p>9. Flip $-\frac{2}{3}$ to $-\frac{3}{2}$ and change sign: $\frac{3}{2}$.</p> <p>10. Flip 1 to 1 and negate: -1.</p> <p>11. Both have slope 2, so the lines are parallel.</p> <p>12. Slopes 3 and $-\frac{1}{3}$ are negative reciprocals — perpendicular.</p> <p>13. Slopes 4 and 5 are not equal and not negative reciprocals.</p> | <p>14. Slopes -1 and 1 multiply to -1, so they are perpendicular.</p> <p>15. Both slopes are $\frac{1}{2}$, so they are parallel.</p> <p>16. $6 \times (-\frac{1}{6}) = -1$, confirming perpendicular lines.</p> <p>17. Read the slope from $y = 7x - 2$: it's 7, and a parallel line matches it.</p> <p>18. Slope is -2; flip to $-\frac{1}{2}$ and negate: $\frac{1}{2}$.</p> <p>19. $-\frac{4}{5}$ and $\frac{5}{4}$ are negative reciprocals: perpendicular.</p> <p>20. Identical slope <i>and</i> intercept — they are the same line.</p> <p>21. Parallel streets have equal slopes, so the new street also has slope $\frac{2}{3}$.</p> <p>22. The perpendicular slope is the negative reciprocal of 5, which is $-\frac{1}{5}$.</p> <p>23. The slopes are -3 and $\frac{1}{3}$. Their product is $-3 \times \frac{1}{3} = -1$, so the roads are perpendicular.</p> <p>24. Parallel lines share a slope, so the path must have slope 4, the same as the fence.</p> |

Want Even More Practice? Check Out Our Other Maryland MCAP Test Books!

Maryland MCAP Grade 8 Math Preparation Bundle

18 full-length practice tests across three books
(5 + 6 + 7)

No repeated questions—maximum practice value!

18 Tests!
3 Books
One Bundle

Important: All our test books contain **unique, completely different tests** from each other! Each book offers fresh practice questions—no repeats!

5 Practice Tests

- ✓ 5 complete practice tests with detailed explanations
- ✓ Perfect foundation for MCAP test preparation
- ✓ Builds confidence and test-taking skills
- ✓ High-quality questions aligned with state standards

Start your practice journey!

6 Practice Tests

- ✓ 6 complete practice tests with detailed explanations
- ✓ **Unique tests**—different from the 5 tests book
- ✓ Perfect for more practice after mastering 5 tests
- ✓ Builds even more confidence and test-taking skills
- ✓ Same high-quality questions aligned with standards

Take your practice to the next level!

7 Practice Tests

- ✓ 7 complete practice tests for maximum preparation
- ✓ **Unique tests**—different from 5 and 6 tests books
- ✓ The most comprehensive practice for Grade 8
- ✓ Ideal for students aiming for top scores
- ✓ Extensive practice builds mastery and confidence

Go all the way with comprehensive practice!
