

# Volume of Cones and Spheres

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Score: \_\_\_\_\_ / 24

## Q Quick Review

Two more volume formulas worth knowing by heart. A **cone** has volume  $V = \frac{1}{3}\pi r^2 h$  — one third of a cylinder with the same radius and height. A **sphere** has volume  $V = \frac{4}{3}\pi r^3$ . In both,  $r$  is the *radius*, so halve the diameter if that's what you're given, and remember to *cube* the radius for a sphere but only *square* it for a cone. Leave  $\pi$  in your answer for an exact value, or use  $\pi \approx 3.14$  when asked for a decimal. Volume is always in *cubic* units.

◇ **Example:** Find the volume of a sphere with radius 3 in. Leave your answer in terms of  $\pi$ .

⇒ The sphere volume formula is  $V = \frac{4}{3}\pi r^3$ . The radius is 3, so cube it first:  $3^3 = 27$ . Now multiply by  $\frac{4}{3} \cdot \frac{4}{3} \times 27 = \frac{108}{3} = 36$ . So the volume is  $36\pi$  cubic inches. Keeping  $\pi$  gives the exact answer.

**Answer:**  $V = 36\pi \text{ in}^3$

## PRACTICE

Find each volume. Leave answers in terms of  $\pi$  unless noted.

## ◆ Word Problems

21. A party hat is shaped like a cone with radius 5 cm and height 12 cm. What is its volume in terms of  $\pi$ ? \_\_\_\_\_
22. A bowling ball is a sphere with radius 6 in. Find its volume in terms of  $\pi$ . \_\_\_\_\_
23. A cone-shaped paper cup has radius 3 cm and height 10 cm. Using  $\pi \approx 3.14$ , how much water does it hold, to the nearest tenth? \_\_\_\_\_
24. A cone and a sphere both have radius 6 cm, and the cone's height is also 6 cm. Which holds more, and by how much? Leave answers in terms of  $\pi$ . \_\_\_\_\_
