

The Quadratic Formula

Name: _____ Date: _____ Score: _____ / 18

Quick Review and Helpful Hints

For $ax^2 + bx + c = 0$, the solutions are $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$. Identify a, b, c , then substitute carefully. The *discriminant* $b^2 - 4ac$ tells how many real solutions: positive gives two, zero gives one, negative gives none.

▶ **Example:** Solve $x^2 + 5x + 6 = 0$ with the formula. **Work:** $a = 1, b = 5, c = 6$. Discriminant = $25 - 24 = 1$. $x = \frac{-5 \pm 1}{2}$. ★ **Answer:** $x = -2$ or $x = -3$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Identify a, b, c , then substitute.

◆ **Practice Problems**

Solve, or find the discriminant, as directed.

◆ **Word Problems**

15. A quadratic revenue model is set equal to zero: $x^2 + 6x + 8 = 0$. Use the formula to find the break-even x -values. _____
16. Before graphing $x^2 + 5x + 6$, a student checks the discriminant. Find it and use it to decide how many real solutions there are. _____
17. A walkway model leads to $x^2 - 8x + 12 = 0$. Use the quadratic formula to solve for x . _____
18. How many real solutions are there if the discriminant equals 0? _____

Answer Keys

1. $x = -2, -3$

2. $x = 4, -1$

3. $x = 3, -4$

4. $x = 2, 3$

5. $x = 3, -1$

6. $x = -3, -4$

7. $x = 3, -3$

8. $x = 1, 5$

9. $x = 3, -5$

10. $x = 2, 5$

11. $x = -1, -3$

12. $x = 5, -4$

13. 1

14. 0

15. $x = -2, -4$

16. 1

17. $x = 2, 6$

18. one

Step-by-Step Explanations

1. Start by naming the process: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $b^2 - 4ac = 25 - 24 = 1$; $x = \frac{-5 \pm 1}{2} = -2, -3$. So the final answer is $x = -2, -3$.

2. A good way to think about this is: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $9 + 16 = 25$; $x = \frac{3 \pm 5}{2} = 4, -1$. So the final answer is $x = 4, -1$.

3. Step by step: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $1 + 48 = 49$; $x = \frac{-1 \pm 7}{2} = 3, -4$. So the final answer is $x = 3, -4$.

4. Take it one move at a time: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $25 - 24 = 1$; $x = \frac{5 \pm 1}{2} = 3, 2$. So the final answer is $x = 2, 3$.

5. Start by naming the process: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $4 + 12 = 16$; $x = \frac{2 \pm 4}{2} = 3, -1$. So the final answer is $x = 3, -1$.

6. A good way to think about this is: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $49 - 48 = 1$; $x = \frac{-7 \pm 1}{2} = -3, -4$. So the final answer is $x = -3, -4$.

7. Step by step: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $a = 1, b = 0, c = -9$; $x = \frac{\pm 6}{2} = 3, -3$. So the final answer is $x = 3, -3$.

8. Take it one move at a time: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $36 - 20 = 16$; $x = \frac{6 \pm 4}{2} = 5, 1$. So the final answer is $x = 1, 5$.

9. Start by naming the process: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $4 + 60 = 64$; $x = \frac{-2 \pm 8}{2} = 3, -5$. So the final answer is $x = 3, -5$.

10. A good way to think about this is: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $49 - 40 = 9$; $x = \frac{7 \pm 3}{2} = 5, 2$. So the final answer is $x = 2, 5$.

11. Step by step: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $16 - 12 = 4$; $x = \frac{-4 \pm 2}{2} = -1, -3$. So the final answer is $x = -1, -3$.

12. Take it one move at a time: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $1 + 80 = 81$; $x = \frac{1 \pm 9}{2} = 5, -4$. So the final answer is $x = 5, -4$.

13. Start by naming the process: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $b^2 - 4ac = 9 - 8 = 1$. So the final answer is 1.

14. A good way to think about this is: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $b^2 - 4ac = 16 - 16 = 0$. So the final answer is 0.

15. Step by step: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $36 - 32 = 4$; $x = \frac{-6 \pm 2}{2} = -2, -4$. So the final answer is $x = -2, -4$.

16. Take it one move at a time: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $25 - 24 = 1$. So the final answer is 1.

17. Start by naming the process: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is $64 - 48 = 16$; $x = \frac{8 \pm 4}{2} = 6, 2$. So the final answer is $x = 2, 6$.

18. A good way to think about this is: Use the quadratic formula step by step: identify a , b , and c , compute the discriminant, then simplify. The setup/work is A discriminant of 0 gives exactly one real solution. So the final answer is one.

Want Even More HiSET Math Practice?

The Most Comprehensive HiSET Math Preparation Bundle

Prep books, workbooks, and full-length practice tests
Complete review, detailed explanations, and realistic test practice

Important: These HiSET Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete HiSET Math preparation bundle.

Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the HiSET test
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps HiSET preparation organized and calm

Move forward prepared.

STUDENT FAVORITE • Master HiSET Math From the Ground Up

HiSET Math for Beginners

The Ultimate Step-by-Step Guide to Preparing for the HiSET Math Test

Written by a top math teacher and aligned with the latest HiSET Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every HiSET Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
