

Multiplying and Dividing Decimals

Name: _____

Date: _____

Score: _____ / 18

Quick Review and Helpful Hints

To *multiply* decimals, ignore the points and multiply like whole numbers, then place the decimal point so the answer has as many decimal places as the two factors combined. To *divide*, shift the divisor's point to make it a whole number, shift the dividend's point the same number of places, and divide.

▷ **Example:** Multiply 0.6×0.4 . **Work:** Ignore the points: $6 \times 4 = 24$. The factors have $1 + 1 = 2$ decimal places, so place the point two spots in. ★ **Answer:** 0.24

$$\begin{array}{r} 0.6 \times 0.4 \\ \downarrow \\ 6 \times 4 = 24 \\ \Rightarrow 0.24 \end{array}$$

$1 + 1 = 2$ decimal places.

◆ Practice Problems

Multiply or divide.

1. 0.2×0.3

8. $4.8 \div 0.4$

2. 0.5×0.4

9. 0.25×4

3. 1.2×0.3

10. 1.5×1.5

4. 0.7×6

11. 0.08×5

5. 2.5×0.4

12. $7.2 \div 0.9$

6. 0.9×0.9

13. 0.6×0.05

7. $3.6 \div 0.6$

14. $9.6 \div 0.8$

◆ Word Problems

15. Three notebooks cost \$2.50 each. What is the total cost?

16. A \$12.60 bill is split equally among 6 people. How much does each pay?

17. Apples cost \$4.40 per pound. What is the cost of 0.5 pound?

18. A track lap is 0.7 mile. How many laps make 8.4 miles?

Answer Keys

|--------------------------------------|---------------------------------------|--|
| 1. <input type="text" value="0.06"/> | 7. <input type="text" value="6"/> | 13. <input type="text" value="0.03"/> |
| 2. <input type="text" value="0.2"/> | 8. <input type="text" value="12"/> | 14. <input type="text" value="12"/> |
| 3. <input type="text" value="0.36"/> | 9. <input type="text" value="1"/> | 15. <input type="text" value="\$7.50"/> |
| 4. <input type="text" value="4.2"/> | 10. <input type="text" value="2.25"/> | 16. <input type="text" value="\$2.10"/> |
| 5. <input type="text" value="1"/> | 11. <input type="text" value="0.4"/> | 17. <input type="text" value="\$2.20"/> |
| 6. <input type="text" value="0.81"/> | 12. <input type="text" value="8"/> | 18. <input type="text" value="12 laps"/> |

Step-by-Step Explanations

1. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Ignore the points and multiply: $2 \times 3 = 6$. The factors have $1 + 1 = 2$ decimal places, so place the point two spots in: 0.06. So the final answer is 0.06.
2. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $5 \times 4 = 20$, with 2 decimal places: 0.20, which is 0.2. So the final answer is 0.2.
3. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $12 \times 3 = 36$, with 2 decimal places: 0.36. So the final answer is 0.36.
4. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $7 \times 6 = 42$, with 1 decimal place: 4.2. So the final answer is 4.2.
5. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $25 \times 4 = 100$, with 2 decimal places: 1.00, which is 1. So the final answer is 1.
6. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $9 \times 9 = 81$, with 2 decimal places: 0.81. So the final answer is 0.81.
7. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Make the divisor whole by moving both points one place: $36 \div 6 = 6$. So the final answer is 6.
8. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Move both points one place: $48 \div 4 = 12$. So the final answer is 12.
9. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $25 \times 4 = 100$, with 2 decimal places: 1.00 = 1. So the final answer is 1.
10. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $15 \times 15 = 225$, with 2 decimal places: 2.25. So the final answer is 2.25.
11. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $8 \times 5 = 40$, with 2 decimal places: 0.40 = 0.4. So the final answer is 0.4.
12. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Move both points one place: $72 \div 9 = 8$. So the final answer is 8.
13. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $6 \times 5 = 30$, with $1 + 2 = 3$ decimal places: 0.030 = 0.03. So the final answer is 0.03.
14. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Move both points one place: $96 \div 8 = 12$. So the final answer is 12.
15. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply the price by the quantity: $2.50 \times 3 = \$7.50$. So the final answer is \$7.50.
16. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Divide the bill among the people: $12.60 \div 6 = \$2.10$ each. So the final answer is \$2.10.
17. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply the cost per pound by the weight: $4.40 \times 0.5 = \$2.20$. So the final answer is \$2.20.
18. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Divide the distance by the lap length: $8.4 \div 0.7$; moving both points gives $84 \div 7 = 12$ laps. So the final answer is 12 laps.

Want Even More Pre-Algebra Practice?

The Ultimate Algebra Bundle: From Pre-Algebra to Algebra II

Prep books and workbooks for the full algebra path
Complete review, detailed explanations, and realistic practice

Algebra II

Important: These Pre-Algebra resources are made for extra practice after the worksheet. Scan the QR code above for the complete algebra preparation bundle.

Skill Review

- ✓ Builds number sense, fractions, ratios, and early algebra skills
- ✓ Supports steady review before quizzes and tests
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Skill Practice

- ✓ Worked examples that model each method
- ✓ Detailed answer explanations for every problem
- ✓ Useful after students finish topic worksheets

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps preparation organized and calm

Move forward prepared.

* **STUDENT'S #1 CHOICE**

Teacher-recommended • trusted
pre-algebra prep

Pre-Algebra for Beginners

The Ultimate Step-by-Step Guide to Preparing for the Pre-Algebra Test

Written by a top math teacher and aligned with pre-algebra courses. From fractions and integers to ratios, percents, and first equations — explained the easy way.

- ✓ **Complete coverage** of every pre-algebra topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
