

Solving Linear-Quadratic Systems

PERT Math • Section 6.6

Name: _____

Date: _____

Score: _____ / 12

Quick Review and Helpful Hints

A system asks for values that satisfy every relationship at the same time. The solution may be one point, no point, or infinitely many points, depending on how the graphs or equations meet.

▷ **Example:** Solve $y = x + 4$ and $y = 10$.

Work: Substitute 10 for y : $10 = x + 4$, so $x = 6$. The solution is the point where both equations agree.

★ **Answer:** (6, 10)

◆ Practice Problems

Solve each problem. Show enough work that another student could follow your thinking.

1. Solve $y = x^2$ and $y = 4$.

2. Solve $y = x^2 + 1$ and $y = 10$.

3. Solve $y = x^2$ and $y = x + 2$.

4. Solve $y = x^2 - 4$ and $y = 0$.

5. Solve $y = -x^2 + 9$ and $y = 5$.

6. Solve $y = x^2 + 2x$ and $y = 0$.

7. Solve $y = x^2$ and $y = 2x + 3$.

8. How many intersections can a line and parabola have?

9. Solve $y = x^2 - 1$ and $y = 3$.

10. Solve $y = 2x^2$ and $y = 8$.

◆ Word Problems

11. A ball height is $h = -t^2 + 4t + 5$ and a platform is at $h = 5$. When do they meet?

12. A parabola $y = x^2$ and line $y = 6x - 8$ model two paths. Find intersections.

Answer Keys

- $(-2, 4)$ and $(2, 4)$
- $(-3, 10)$ and $(3, 10)$
- $(-1, 1)$ and $(2, 4)$
- $(-2, 0)$ and $(2, 0)$
- $(-2, 5)$ and $(2, 5)$
- $(-2, 0)$ and $(0, 0)$
- $(-1, 1)$ and $(3, 9)$
- $0, 1,$ or 2
- $(-2, 3)$ and $(2, 3)$
- $(-2, 8)$ and $(2, 8)$
- $t = 0$ and $t = 4$
- $(2, 4)$ and $(4, 16)$

Step-by-Step Explanations

- Both equal y , so $x^2 = 4$ — and squaring either -2 or 2 lands you on 4 .
- Where they meet, $x^2 + 1 = 10$, so peel off the 1 to find $x^2 = 9$.
- Match the y 's: $x^2 = x + 2$. Slide everything left and factor to catch both crossings.
- Setting $y = 0$ asks where the parabola hits the x -axis, so solve $x^2 = 4$.
- Equal heights mean $-x^2 + 9 = 5$; tidy it up and $x^2 = 4$ pops right out.
- A product equals zero only when a piece is zero, so factor $x(x + 2)$ and read off both roots.
- Curve meets line when $x^2 = 2x + 3$; move it all to one side and the quadratic gives two answers.
- Picture sliding a line across a parabola — it can sail past, just graze it, or slice clean through twice.
- At the meeting point $x^2 - 1 = 3$; add the 1 back over and you get $x^2 = 4$.
- Equal y -values give $2x^2 = 8$; divide by 2 first and $x^2 = 4$ is left.
- The ball is level with the platform when $-t^2 + 4t = 0$; factor out $-t$ to find both times.
- The paths cross where $x^2 = 6x - 8$; gather terms and factor to find the two spots they share.

Want Even More PERT Math Practice?

The Most Comprehensive PERT Math Preparation Bundle

Prep books, workbooks, and full-length practice tests

Complete review, detailed explanations, and realistic test practice

**Prep Books
Workbooks
Practice Tests**

Important: These PERT Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete PERT Math preparation bundle.

Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the PERT test
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps PERT preparation organized and calm

Move forward prepared.

PERT Math for Beginners

The Ultimate Step-by-Step Guide to Preparing for the PERT Math Test

Written by a top math teacher and aligned with the latest PERT Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every PERT Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
