

# Solving Two-Step Equations

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Score: \_\_\_\_\_ / 18

**Quick Review and Helpful Hints**

A *two-step equation* takes two inverse operations to solve. First undo the addition or subtraction (move the constant), then undo the multiplication or division (free the variable). Always do the same thing to both sides.

▷ **Example:** Solve  $2x + 3 = 11$ . **Work:** Subtract 3 from both sides:  
 $2x = 8$ . Divide both sides by 2:  $x = 4$ .      ★ **Answer:**  $x = 4$

◆ **Practice Problems**

Solve each equation.

◆ **Word Problems**

15. A taxi charges \$2 plus \$3 per mile. A ride costs \$14. How many miles was it? \_\_\_\_\_
16. You start with \$5 and add \$4 each week. After how many weeks do you have \$25? \_\_\_\_\_
17. Three more than four times a number is 19. Find the number. \_\_\_\_\_
18. A gym costs \$20 to join plus \$10 per month. The total is \$60. How many months? \_\_\_\_\_

## Answer Keys

1.  $x = 4$

2.  $x = 7$

3.  $x = 3$

4.  $x = 4$

5.  $x = 8$

6.  $x = 9$

7.  $x = 3$

8.  $x = 3$

9.  $x = -3$

10.  $x = 3$

11.  $x = 8$

12.  $x = 3$

13.  $x = -3$

14.  $x = 3$

15. 4 miles

16. 5 weeks

17. 4

18. 4 months

### Step-by-Step Explanations

1. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 3:  $2x = 8$ . Divide by 2:  $x = 4$ . So the final answer is  $x = 4$ .

2. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Add 5:  $3x = 21$ . Divide by 3:  $x = 7$ . So the final answer is  $x = 7$ .

3. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 1:  $4x = 12$ . Divide by 4:  $x = 3$ . So the final answer is  $x = 3$ .

4. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Add 2:  $5x = 20$ . Divide by 5:  $x = 4$ . So the final answer is  $x = 4$ .

5. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 1:  $\frac{x}{2} = 4$ . Multiply by 2:  $x = 8$ . So the final answer is  $x = 8$ .

6. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Add 2:  $\frac{x}{3} = 3$ . Multiply by 3:  $x = 9$ . So the final answer is  $x = 9$ .

7. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 4:  $6x = 18$ . Divide by 6:  $x = 3$ . So the final answer is  $x = 3$ .

8. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Add 7:  $2x = 6$ . Divide by 2:  $x = 3$ . So the final answer is  $x = 3$ .

9. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 9:  $3x = -9$ . Divide by 3:  $x = -3$ . So the final answer is  $x = -3$ .

10. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Add 3:  $7x = 21$ . Divide by 7:  $x = 3$ . So the final answer is  $x = 3$ .

11. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 3:  $\frac{x}{4} = 2$ . Multiply by 4:  $x = 8$ . So the final answer is  $x = 8$ .

12. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 10:  $-2x = -6$ . Divide by  $-2$ :  $x = 3$ . So the final answer is  $x = 3$ .

13. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 5:  $-3x = 9$ . Divide by  $-3$ :  $x = -3$ . So the final answer is  $x = -3$ .

14. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Subtract 5:  $8x = 24$ . Divide by 8:  $x = 3$ . So the final answer is  $x = 3$ .

15. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Set up  $3m + 2 = 14$ . Subtract 2:  $3m = 12$ , so  $m = 4$  miles. So the final answer is 4 miles.

16. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Set up  $4w + 5 = 25$ . Subtract 5:  $4w = 20$ , so  $w = 5$  weeks. So the final answer is 5 weeks.

17. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Set up  $4x + 3 = 19$ . Subtract 3:  $4x = 16$ , so  $x = 4$ . So the final answer is 4.

18. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Set up  $10m + 20 = 60$ . Subtract 20:  $10m = 40$ , so  $m = 4$  months. So the final answer is 4 months.

## Want Even More PERT Math Practice?

### The Most Comprehensive PERT Math Preparation Bundle

Prep books, workbooks, and full-length practice tests

Complete review, detailed explanations, and realistic test practice

Scan Me

Prep Books  
Workbooks  
Practice Tests

**Important:** These PERT Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete PERT Math preparation bundle.

#### Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the PERT test
- ✓ Great for tutoring, homework, and independent practice

**Build the foundation.**

#### Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

**Practice with purpose.**

#### Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps PERT preparation organized and calm

**Move forward prepared.**

### STUDENT FAVORITE • Master PERT Math From the Ground Up

#### PERT Math for Beginners

*The Ultimate Step-by-Step Guide to Preparing for the PERT Math Test*

Written by a top math teacher and aligned with the latest PERT Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every PERT Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom

\* **STUDENT'S #1 CHOICE**
