

Factoring Trinomials

Name: _____ Date: _____ Score: _____ / 18

Quick Review and Helpful Hints

To factor $x^2 + bx + c$, find two numbers that *multiply* to c and *add* to b . Then write the factors as $(x + \square)(x + \square)$ using those numbers. Watch the signs: a positive c means the numbers share a sign; a negative c means they have opposite signs.

▶ **Example:** Factor $x^2 + 5x + 6$. **Work:** Find two numbers that multiply to 6 and add to 5: that's 2 and 3. Write them as factors.

★ **Answer:** $(x + 2)(x + 3)$

	x	2
x	x^2	$2x$
3	$3x$	6

$(x + 2)(x + 3) = x^2 + 5x + 6.$

Practice Problems

Factor each trinomial.

- | | | | |
|---------------------|-------|---------------------|-------|
| 1. $x^2 + 5x + 6$ | _____ | 8. $x^2 - 11x + 30$ | _____ |
| 2. $x^2 + 8x + 15$ | _____ | 9. $x^2 + 4x - 12$ | _____ |
| 3. $x^2 - 6x + 8$ | _____ | 10. $x^2 + 7x + 12$ | _____ |
| 4. $x^2 - 3x - 10$ | _____ | 11. $x^2 - 9x + 20$ | _____ |
| 5. $x^2 + 2x - 24$ | _____ | 12. $x^2 + x - 12$ | _____ |
| 6. $x^2 - 10x + 21$ | _____ | 13. $x^2 - 4x - 21$ | _____ |
| 7. $x^2 + x - 30$ | _____ | 14. $x^2 + 9x + 14$ | _____ |

Word Problems

15. A rectangle has area $x^2 + 7x + 10$. Write its length and width as factors. _____
16. A rectangular garden model has area $x^2 - 5x - 14$. Factor it to represent possible side expressions. _____
17. The area of a square plus its border is $x^2 + 6x + 9$. Factor it. _____
18. A photo mat area is modeled by $x^2 + 10x + 24$. Factor it to show the side expressions. _____

Answer Keys

- | | | |
|---------------------|----------------------|----------------------|
| 1. $(x + 2)(x + 3)$ | 7. $(x + 6)(x - 5)$ | 13. $(x - 7)(x + 3)$ |
| 2. $(x + 3)(x + 5)$ | 8. $(x - 5)(x - 6)$ | 14. $(x + 2)(x + 7)$ |
| 3. $(x - 2)(x - 4)$ | 9. $(x + 6)(x - 2)$ | 15. $(x + 2)(x + 5)$ |
| 4. $(x - 5)(x + 2)$ | 10. $(x + 3)(x + 4)$ | 16. $(x - 7)(x + 2)$ |
| 5. $(x + 6)(x - 4)$ | 11. $(x - 4)(x - 5)$ | 17. $(x + 3)^2$ |
| 6. $(x - 3)(x - 7)$ | 12. $(x + 4)(x - 3)$ | 18. $(x + 4)(x + 6)$ |

Step-by-Step Explanations

1. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Two numbers that multiply to 6 and add to 5 are 2 and 3: $(x + 2)(x + 3)$. So the final answer is $(x + 2)(x + 3)$.

2. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 15, add to 8: 3 and 5: $(x + 3)(x + 5)$. So the final answer is $(x + 3)(x + 5)$.

3. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 8, add to -6 : both negative, -2 and -4 : $(x - 2)(x - 4)$. So the final answer is $(x - 2)(x - 4)$.

4. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -10 , add to -3 : -5 and 2 : $(x - 5)(x + 2)$. So the final answer is $(x - 5)(x + 2)$.

5. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -24 , add to 2: 6 and -4 : $(x + 6)(x - 4)$. So the final answer is $(x + 6)(x - 4)$.

6. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 21, add to -10 : -3 and -7 : $(x - 3)(x - 7)$. So the final answer is $(x - 3)(x - 7)$.

7. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -30 , add to 1: 6 and -5 : $(x + 6)(x - 5)$. So the final answer is $(x + 6)(x - 5)$.

8. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 30, add to -11 : -5 and -6 : $(x - 5)(x - 6)$. So the final answer is $(x - 5)(x - 6)$.

9. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -12 , add to 4: 6 and -2 : $(x + 6)(x - 2)$. So the final answer is $(x + 6)(x - 2)$.

10. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 12, add to 7: 3 and 4: $(x + 3)(x + 4)$. So the final answer is $(x + 3)(x + 4)$.

11. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 20, add to -9 : -4 and -5 : $(x - 4)(x - 5)$. So the final answer is $(x - 4)(x - 5)$.

12. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -12 , add to 1: 4 and -3 : $(x + 4)(x - 3)$. So the final answer is $(x + 4)(x - 3)$.

13. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -21 , add to -4 : -7 and 3: $(x - 7)(x + 3)$. So the final answer is $(x - 7)(x + 3)$.

14. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 14, add to 9: 2 and 7: $(x + 2)(x + 7)$. So the final answer is $(x + 2)(x + 7)$.

15. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 10, add to 7: 2 and 5: $(x + 2)(x + 5)$. So the final answer is $(x + 2)(x + 5)$.

16. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to -14 , add to -5 : -7 and 2: $(x - 7)(x + 2)$. So the final answer is $(x - 7)(x + 2)$.

17. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 9, add to 6: 3 and 3, a perfect square: $(x + 3)^2$. So the final answer is $(x + 3)^2$.

18. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Multiply to 24, add to 10: 4 and 6: $(x + 4)(x + 6)$. So the final answer is $(x + 4)(x + 6)$.

Want Even More TSIA2 Math Practice?

The Most Comprehensive TSIA2 Math Preparation Bundle

Prep books, workbooks, and full-length practice tests

Complete review, detailed explanations, and realistic test practice

Important: These TSIA2 Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete TSIA2 Math preparation bundle.

Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the TSIA2 test
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps TSIA2 preparation organized and calm

Move forward prepared.

STUDENT FAVORITE • Master TSIA2 Math From the Ground Up

TSI Math for Beginners

The Ultimate Step-by-Step Guide to Preparing for the TSI Math Test

Written by a top math teacher and aligned with the latest TSIA2 Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every TSIA2 Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
