

Lines of Best Fit and Predictions

TSIA2 Math •Section 10.4

Name: _____	Date: _____	Score: _____ / 12
-------------	-------------	-------------------

Quick Review and Helpful Hints

Data questions are about choosing the right summary. Read the labels carefully, identify the total or condition being used, and connect each statistic to what it tells about the data.

▷ **Example:** Find the mean of 6, 8, 10, 12.

Work: Add the values to get 36, then divide by 4 values.

★ **Answer:** 9

◆ **Practice Problems**

Solve each problem. Show enough work that another student could follow your thinking.

- | | |
|--|---|
| <p>1. Use $y = 2x + 5$ to predict y when $x = 10$.
_____</p> <p>2. Use $y = -3x + 40$ to predict y when $x = 7$.
_____</p> <p>3. What does slope mean in a line of best fit?
_____</p> <p>4. What does the intercept mean?
_____</p> <p>5. Is predicting inside the data range interpolation or extrapolation?
_____</p> | <p>6. Is predicting beyond the data range interpolation or extrapolation?
_____</p> <p>7. A best-fit line is $y = 4x + 12$. What is the slope?
_____</p> <p>8. A residual is actual minus predicted. Actual 30, predicted 26. Find residual.
_____</p> <p>9. If residuals are mostly positive for large x, what may be wrong?
_____</p> <p>10. Use $y = 1.5x + 20$ to predict at $x = 8$.
_____</p> |
|--|---|

◆ **Word Problems**

11. A plant model is $h = 3d + 4$. Predict height at day 12.

12. A line of best fit predicts sales $S = 250 - 8p$. Interpret slope.

Answer Keys

- | | |
|---------------------------------|--|
| 1. 25 | 7. 4 |
| 2. 19 | 8. 4 |
| 3. Average rate of change | 9. The model may underpredict for large x |
| 4. Predicted value when $x = 0$ | 10. 32 |
| 5. Interpolation | 11. 40 |
| 6. Extrapolation | 12. Sales decrease by about 8 for each 1-unit price increase |

Step-by-Step Explanations

- Predicting is just plugging in — swap x for 10 and compute $2(10) + 5 = 25$.
- Drop 7 in for x and follow through: $-3(7) + 40$ lands on 19.
- Slope tells you, on average, how much y shifts each time x goes up by one.
- The intercept is where the model begins — the predicted y before x has moved at all.
- Staying inside the range you actually collected data for is interpolation — the safer kind of prediction.
- Reaching past the data you have is extrapolation, and it's riskier since the pattern may not hold out there.
- In $y = mx + b$, the slope is whatever multiplies x — so it's 4 here.
- A residual measures how far off the model was: $30 - 26 = 4$, so the prediction came in a bit low.
- Positive residuals mean the real values sit above the line — the model is guessing too low up there.
- Substitute 8 for x : $1.5(8)$ is 12, and adding 20 gives 32.
- Let $d = 12$ and work it out: $3(12) + 4 = 40$ for the predicted height.
- The slope of -8 is a rate — every dollar the price climbs, predicted sales slide down by about 8.

The Most Comprehensive TSIA2 Math Preparation Bundle

Prep books, workbooks, and full-length practice tests

Complete review, detailed explanations, and realistic test practice

Prep Books
Workbooks
Practice Tests

Important: These TSIA2 Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete TSIA2 Math preparation bundle.

Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the TSIA2 test
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps TSIA2 preparation organized and calm

Move forward prepared.

TSI Math for Beginners

The Ultimate Step-by-Step Guide to Preparing for the TSI Math Test

Written by a top math teacher and aligned with the latest TSIA2 Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every TSIA2 Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
