

Simple Interest

Name: _____

Date: _____

Score: _____ / 18

Quick Review and Helpful Hints

Simple interest is $I = P \cdot r \cdot t$, where P is the principal (starting amount), r is the yearly rate written as a *decimal*, and t is the time in years. The total amount is $A = P + I$. Always change the percent rate to a decimal before multiplying.

► **Example:** Find the simple interest on \$500 at 4% for 3 years.

Work: Use $I = Prt$ with $r = 0.04$: $I = 500 \times 0.04 \times 3$. Multiply step by step: $500 \times 0.04 = 20$, then 20×3 .

★ **Answer:** \$60

$$I = P \times r \times t.$$

◆ Practice Problems

Find the simple interest I .

1. $P = \$100$, $r = 5\%$, $t = 1$ yr _____

2. $P = \$200$, $r = 10\%$, $t = 2$ yr _____

3. $P = \$1000$, $r = 3\%$, $t = 4$ yr _____

4. $P = \$500$, $r = 6\%$, $t = 1$ yr _____

5. $P = \$800$, $r = 5\%$, $t = 2$ yr _____

6. $P = \$1500$, $r = 4\%$, $t = 3$ yr _____

7. $P = \$250$, $r = 8\%$, $t = 1$ yr _____

8. $P = \$2000$, $r = 2\%$, $t = 5$ yr _____

9. $P = \$400$, $r = 10\%$, $t = 3$ yr _____

10. $P = \$600$, $r = 5\%$, $t = 4$ yr _____

11. $P = \$1200$, $r = 6\%$, $t = 2$ yr _____

12. $P = \$300$, $r = 4\%$, $t = 5$ yr _____

13. $P = \$5000$, $r = 3\%$, $t = 1$ yr _____

14. $P = \$900$, $r = 10\%$, $t = 2$ yr _____

◆ Word Problems

15. You deposit \$1000 at 5% simple interest for 3 years. How much interest do you earn? _____

16. A \$2000 loan is at 4% simple interest for 2 years. What is the total amount to repay? _____

17. How much interest does \$500 earn at 6% for 1 year? _____

18. A \$1500 investment earns 8% simple interest for 2 years. How much interest is that? _____

Answer Keys

- | | | |
|----------|-----------|------------|
| 1. \$5 | 7. \$20 | 13. \$150 |
| 2. \$40 | 8. \$200 | 14. \$180 |
| 3. \$120 | 9. \$120 | 15. \$150 |
| 4. \$30 | 10. \$120 | 16. \$2160 |
| 5. \$80 | 11. \$144 | 17. \$30 |
| 6. \$180 | 12. \$60 | 18. \$240 |

Step-by-Step Explanations

1. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Use $I = Prt$. Change 5% to 0.05, then multiply: $100 \times 0.05 \times 1 = \5 . So the final answer is \$5.

2. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 200 \times 0.10 \times 2$. Step by step: $200 \times 0.10 = 20$, then $20 \times 2 = \$40$. So the final answer is \$40.

3. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 1000 \times 0.03 \times 4 = 30 \times 4 = \120 . So the final answer is \$120.

4. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 500 \times 0.06 \times 1 = \30 . So the final answer is \$30.

5. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 800 \times 0.05 \times 2 = 40 \times 2 = \80 . So the final answer is \$80.

6. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 1500 \times 0.04 \times 3 = 60 \times 3 = \180 . So the final answer is \$180.

7. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 250 \times 0.08 \times 1 = \20 . So the final answer is \$20.

8. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 2000 \times 0.02 \times 5 = 40 \times 5 = \200 . So the final answer is \$200.

9. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 400 \times 0.10 \times 3 = 40 \times 3 = \120 . So the final answer is \$120.

10. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 600 \times 0.05 \times 4 = 30 \times 4 = \120 . So the final answer is \$120.

11. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 1200 \times 0.06 \times 2 = 72 \times 2 = \144 . So the final answer is \$144.

12. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 300 \times 0.04 \times 5 = 12 \times 5 = \60 . So the final answer is \$60.

13. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 5000 \times 0.03 \times 1 = \150 . So the final answer is \$150.

14. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 900 \times 0.10 \times 2 = 90 \times 2 = \180 . So the final answer is \$180.

15. Step by step: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Use $I = Prt$: $1000 \times 0.05 \times 3 = 50 \times 3 = \150 interest. So the final answer is \$150.

16. Take it one move at a time: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is Interest is $2000 \times 0.04 \times 2 = 80 \times 2 = \160 . The total to repay is $2000 + 160 = \$2160$. So the final answer is \$2160.

17. Start by naming the process: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 500 \times 0.06 \times 1 = \30 . So the final answer is \$30.

18. A good way to think about this is: Read what the problem is asking, choose the matching rule, write the setup, and then simplify one step at a time. The setup/work is $I = 1500 \times 0.08 \times 2 = 120 \times 2 = \240 . So the final answer is \$240.

Want Even More TSIA2 Math Practice?

The Most Comprehensive TSIA2 Math Preparation Bundle

Prep books, workbooks, and full-length practice tests

Complete review, detailed explanations, and realistic test practice

Important: These TSIA2 Math resources are made for extra practice after the worksheet. Scan the QR code above for the complete TSIA2 Math preparation bundle.

Skill Review

- ✓ Builds number sense, algebra, geometry, and data skills
- ✓ Supports steady review before the TSIA2 test
- ✓ Great for tutoring, homework, and independent practice

Build the foundation.

Test Practice

- ✓ Full-length practice tests for realistic pacing
- ✓ Detailed answer explanations for every question
- ✓ Useful after students finish topic worksheets

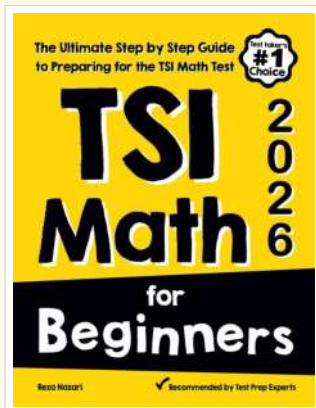

Practice with purpose.

Confidence

- ✓ Turns mistakes into targeted review
- ✓ Helps students see progress over time
- ✓ Keeps TSIA2 preparation organized and calm

Move forward prepared.

STUDENT FAVORITE • Master TSIA2 Math From the Ground Up

TSI Math for Beginners

The Ultimate Step-by-Step Guide to Preparing for the TSI Math Test

Written by a top math teacher and aligned with the latest TSIA2 Math test. From fractions and percents to algebra and geometry — explained the easy way.

- ✓ **Complete coverage** of every TSIA2 Math topic — perfect companion to these worksheets
- ✓ **Step-by-step explanations** with worked examples on every topic
- ✓ **QR codes in every chapter** for free video lessons & bonus practice
- ✓ **2 full-length practice tests** with detailed answer keys
- ✓ Perfect for self-study or the classroom
